Advances in Robot Kinematics: Motion in Man and Machine Jadran Lenarčič, Michael M. Stanišić, 2010-07-20 The 1st International Meeting of Advances in Robot Kinematics ARK occurred in September 1988 by invitation to Ljubljana Slovenia of a group of 20 internationally recognized researchers representing six different countries from three continents There were 22 lectures and approximately 150 attendees This success of bringing together excellent research and the international community led to the formation of a Scientific Committee and the decision to repeat the event biannually The meeting was made open to all individuals with a critical peer review process of submitted papers The meetings have since been continuously supported by the Jozef Stefan Institute and since 1992 have come under patronage of the International Federation for the Promotion of Mechanism and Machine Science IFToMM Springer published the 1st book of the series in 1991 and since 1994 Kluwer and Springer have published a book of the presented papers every two years The papers in this book present the latest topics and methods in the kinematics control and design of robotic manipulators They consider the full range of robotic systems including serial parallel and cable driven manipulators both planar and spatial The systems range from being less than fully mobile to kinematically redundant to overconstrained The meeting included recent advances in emerging areas such as the design and control of humanoids and humanoid subsystems the analysis modeling and simulation of human body motion the mobility analysis of protein molecules and the development of systems which integrate man and
