Walas, 1991 Modelling with Differential Equations in Chemical Engineering covers the modelling of rate processes of engineering in terms of differential equations While it includes the purely mathematical aspects of the solution of differential equations the main emphasis is on the derivation and solution of major equations of engineering and applied science Methods of solving differential equations by analytical and numerical means are presented in detail with many solved examples and problems for solution by the reader Emphasis is placed on numerical and computer methods of solution A key chapter in the book is devoted to the principles of mathematical modelling These principles are applied to the equations in important engineering areas The major disciplines covered are thermodynamics diffusion and mass transfer heat transfer fluid dynamics chemical reactions and automatic control These topics are of particular value to chemical engineers but also are of interest to mechanical civil and environmental engineers as well as applied scientists The material is also suitable for undergraduate and beginning graduate students as well as for review by practising engineers **Previews of Heat and Mass Transfer**, 1995 *The British National Bibliography* Arthur James Wells, 2003 **Fundamentals of Engineering Thermodynamics, SI Version** Michael J. Moran, Howard N.

Shapiro,1998-07-07 Presents a comprehensive and rigorous treatment of the subject from the classical perspective to offer a problem solving methodology that encourages systematic thinking Noted for its treatment of the second law this text clearly presents both theory and application The presentation of chemical availability has been extended by a cutting edge discussion of standard chemical availability Design applications and problems have been updated to include economic considerations Environmental topics have also been expanded and updated The new version of Interactive Thermodynamics IT is a powerful windows based software program that now includes equation solver printing graphing data retrieval and simulation capabilities
