Tea K.C. Willson, M.N. Clifford, 2012-12-06 Tea is a unique crop and incidentally a very interesting and attractive one The tea bush its cultivation and harvesting do not fit into any typical cropping pattern Moreover its processing and marketing are specific to tea Thus the Tea Industry stands apart and constitutes a self contained entity This is reflected in the title given to this book Tea Cultivation to consumption and its treatment of the subject The book is logically planned starting with the plant itself and finishing with the traditional cuppa Every aspect of tea production is covered inevitably some in greater detail than others However it gives an authentic and comprehensive picture of the tea industry The text deals in detail with cultural practices and research where desirable on a regional basis The technology of tea cultivation and processing has been developed within the industry aided by applied research which was largely financed by the tea companies themselves This contributed to a technically competent industry but tended to bypass the more academic and fundamental investigations which might bring future rewards The sponsorship of research has now widened and the range and depth of tea research has increased accordingly The editors and authors of this book have played their part in these recent developments which are well reported in the book **Catalogue** International Organization for Standardization, 2008 Report of the TEAP, May 2006 Progress Report, 2006 Medical Toxicology of Natural Substances Donald G.
