Society. Meeting,2005 Brains Dale Purves,2010-01-08 For 50 years the world's most brilliant neuroscientists have struggled to understand how human brains really work Today says Dale Purves the dominant research agenda may have taken us as far as it can and neuroscientists may be approaching a paradigm shift In this highly personal book Purves reveals how we got to this point and offers his notion of where neuroscience may be headed next Purves guides you through a half century of the most influential ideas in neuroscience and introduces the extraordinary scientists and physicians who created and tested them Purves offers a critical assessment of the paths that neuroscience research has taken their successes and their limitations and then introduces an alternative approach for thinking about brains Building on new research on visual perception he shows why common ideas about brain networks can't be right and uncovers the factors that determine our subjective experience The resulting insights offer a deeper understanding of what it means to be human Why we need a better conception of what brains are trying to do and how they do it Approaches to understanding the brain over the past several decades may be at an impasse The surprising lessons that can be learned from what we see How complex neural processes owe more to trial and error experience than to logical principles Brains and the people who think about them Meet some of the extraordinary individuals who've shaped neuroscience The ghost in the machine problem The ideas presented further undermine the concept of free will **Neurology & Neuroscience** Richard T. Johnson,2001 *Iconoclast* Gregory Berns,2010-03-17 No organization can survive without iconoclasts innovators who single handedly upturn conventional wisdom and manage to achieve what so many others deem impossible Though indispensable true iconoclasts are few and far between In *Iconoclast* neuroscientist Gregory Berns explains why He explores the constraints the human brain places on innovative thinking including fear of failure the urge to conform and the tendency to interpret sensory information in familiar ways Through vivid accounts of successful innovators ranging from glass artist Dale Chihuly to physicist Richard Feynman to country rock trio the Dixie Chicks Berns reveals the inner workings of the iconoclast's mind with remarkable clarity Each engaging chapter goes on to describe practical actions we can each take to understand and unleash our own potential to think differently such as seeking out new environments novel experiences and first time acquaintances Packed with engaging stories science based insights potent practices and examples from a startling array of disciplines this engaging book will help you understand how iconoclasts think and equip you to begin thinking more like an iconoclast yourself *Bibliografia nazionale italiana* ,2009 Neuroscience Dale Purves,2008 Created primarily for medical and premedical students Neuroscience emphasizes the structure of the nervous system the correlation of structure and function and the structure function relationships particularly pertinent to the practice of medicine **Principles of Comparative Psychology** Gary Greenberg,Maury M. Haraway,2002 This textbook presents a unified theoretical perspective of comparative psychology presenting the traditional principles of the field combined with the strength of current empirical research Drawing on a rich historical tradition *Principles of Comparative Psychology* looks to the future of the discipline in the 21st century The authors

have conceived this field broadly as the study of origins of all behavior while utilizing a developmental perspective in which behavior is understood to be the result of a fusion of biological and psychosocial factors Particular recognition is given to some of the unique problems of the discipline in carrying out a careful application of the scientific method to its chosen subject matter of mind and behavior
