Peter John Dye, 2015-09-15 In the latest addition to the History of Military Aviation series Peter Dye describes how the  
development of the air weapon on the Western Front during World War I required a radical and unprecedented change in the  
way that national resources were employed to exploit a technological opportunity World War I has long been recognized as  
an industrial war that consumed vast amounts of materiel and where logistical superiority gave the Allies an overwhelming  
advantage The Bridge to Air Power is the first study that demonstrates how logistical competence provided a war winning  
advantage for the Royal Flying Corps the precursor to the Royal Air Force It draws on a wide range of literature and original  
material to quantify these achievements while providing a series of illuminating case studies based around key battles In  
particular it highlights how the Royal Flying Corps logistical organization was able to maintain high levels of resilience and  
agility while sustaining military outputs under widely different operational conditions successfully introducing many of the

techniques that now comprise modern supply chain management     The Students' Guide to Graduate Studies in the UK.
