Characteristics Of Modern Philosophy:

On Some Characteristics of Modern Philosophy George Barraclough, 1868 The Princeton Theological Review, 1903
Includes section Reviews of recent literature **The Delphic Maxims in Literature** Eliza Gregory Wilkins, 1929 **Kant on Intuition** Stephen R. Palmquist, 2018-11-08
Kant on Intuition Western and Asian Perspectives on Transcendental Idealism consists of 20 chapters many of which feature engagements between Kant and various Asian philosophers Key themes include the nature of human intuition not only as theoretical pure sensible and possibly intellectual but also as relevant to Kant's practical philosophy aesthetics the sublime and even mysticism the status of Kant's idealism realism and Kant's notion of an object Roughly half of the chapters take a stance on the recent conceptualism non conceptualism debate The chapters are organized into four parts each with five chapters Part I explores themes relating primarily to the early sections of Kant's first Critique three chapters focus mainly on Kant's theory of the forms of intuition and or formal intuition especially as illustrated by geometry while two examine the broader role of intuition in transcendental idealism Part II continues to examine themes from the Aesthetic but shifts the main focus to the Transcendental Analytic where the key question challenging interpreters is to determine whether intuition via sensibility is ever capable of operating independently from conception via understanding each contributor offers a defense of either the conceptualist or the non conceptualist readings of Kant's text Part III includes three chapters that explore the relevance of intuition to Kant's theory of the sublime followed by two that examine challenges that Asian philosophers have raised against Kant's theory of intuition particularly as it relates to our experience of the supersensible Finally Part IV concludes the book with five chapters that explore a range of resonances between Kant and various Asian philosophers and philosophical ideas **The Monist** Paul Carus, 1920 Vols 2 and 5 include appendices Abstracts of The Collected Works of C. G. Jung Carrie Lee Rothgeb, Siegfried M. Clemens, 1978
Max Horkheimer and the Foundations of the Frankfurt School John Abromeit, 2011-10-10 This book is the first comprehensive intellectual biography of Max Horkheimer during the early and middle phases of his life 1895-1941 Drawing on unexamined new sources John Abromeit describes the critical details of Horkheimer's intellectual development This study recovers and reconstructs the model of early Critical Theory that guided the work of the Institute for Social Research in the 1930s Horkheimer is remembered primarily as the co author of *Dialectic of Enlightenment* which he wrote with Theodor W Adorno in the early 1940s But few people realize that Horkheimer and Adorno did not begin working together seriously until the late 1930s or that the model of Critical Theory developed by Horkheimer and Erich Fromm in the late 1920s and early 1930s differs in crucial ways from *Dialectic of Enlightenment* Abromeit highlights the ways in which Horkheimer's early Critical Theory remains relevant to contemporary theoretical discussions in a wide variety of fields **A Philosophical Critique of Thought** Zhengyu Sun, 2020-11-02 This book is mainly concerned with elaborating an account of the unique theoretical essence and activities of philosophy What manner of civilization should modern humans forge On what

developmental path should a nation embark What lifestyle should each individual choose These are the most fundamental issues of our time Profoundly implicit in the choices outlined above is a deeper question What are the criteria of choice An examination of these criteria is a reflection on the premises constituting thought or a critique of the premises underlying thought Using a critique of the premises underlying thought as the basic idea and hermeneutic principle in philosophy will open a wider theoretical space for contemporary philosophy so as to avoid the predicament of being pseudo scientific or pseudo artistic It will also present contemporary philosophy with a realistic path of development for the task of reflecting on the criteria of choice This book seeks to formulate concrete philosophical arguments for a critique of the basic beliefs logic modes concepts and philosophical ideas which constitute thought with the aim of demonstrating the vigorous self critique and inexhaustible theoretical space found in philosophical development This book provides a new principle of interpretation for understanding philosophy and in turn uses this principle to develop a critique of the premises underlying thought thereby furthering the contemporary development of philosophy This book encompasses a critique of the premises underlying thought which mainly includes the basic beliefs logic modes concepts and philosophical ideas constituting thought Such a critique should comprise five aspects First the basic beliefs constituting thought propose a critique of the identity of thought and being second the basic logic constituting thought refers to a critique of the formal intensional and practical logic of thought third the basic modes constituting thought denote a critique of the basic modes by which humans comprehend the world including commonsense religion art and science fourth the basic concepts constituting thought entail a critique centering on being the world history truth value and other basic concepts and finally the philosophical ideas constituting thought indicate a critique of philosophy itself A critique aligned on these five aspects will provide a general philosophical overview of the premise critique of thought
