

ISO 8501-1 Pictorial Standards of Cleanliness

ISO 8501-1 is a pictorial standard relating to surface cleanliness, amongst other methods, though abrasive blasting. The original condition of steel surfaces prior to blasting are depicted in various stages of corrosion as follows:

- Grade A** Steel surface largely covered with adhering mill scale but little, if any rust
Grade B Steel surface which has begun to rust and from which the mill scale has begun to flake
Grade C Steel surface on which the mill scale has rusted away or from which it can be scraped, but with slight pitting visible under normal vision.
Grade D Steel surface on which the mill scale has rusted away and on which general pitting is visible under normal vision

Standard notation usually, but not always, includes the original condition of steel before blasting i.e. "B Sa3". Pictorial standards of cleanliness (Sa1, Sa2, Sa2.5 and Sa3) are depicted overleaf.
