

The top portion of the cover features a red background with white circuit diagrams. These diagrams include a complex network of lines at the top, followed by two identical stages of a differential pair of MOSFETs. Each stage consists of two transistors with their gates connected to a common biasing network and their sources connected to a common source resistor. The gates of the transistors are connected to a common gate biasing network. The output nodes are connected to a load network. The bottom portion of the cover features a dark red background with a faint, larger-scale version of the same circuit diagrams.
