**Handbook of Research on AI and Machine Learning Applications in Customer Support and Analytics** Hossain, Md Shamim, Ho, Ree Chan, Trajkovski, Goran, 2023-05-02 In the modern data driven era artificial intelligence AI and machine learning ML technologies that allow a computer to mimic intelligent human behavior are essential for organizations to achieve business excellence and assist organizations in extracting useful information from raw data AI and ML have existed for decades but in the age of big data this sort of analysis is in higher demand than ever especially for customer support and analytics The Handbook of Research on AI and Machine Learning Applications in Customer Support and Analytics investigates the applications of AI and ML and how they can be implemented to enhance customer support and analytics at various levels of organizations This book is ideal for marketing professionals managers business owners researchers practitioners academicians instructors university libraries and students and covers topics such as artificial intelligence machine learning supervised learning deep learning customer sentiment analysis data mining neural networks and business analytics

**Machine Learning** Shraban Kumar Apat, Bhavani Sankar Panda, 2022-08-05 Machine learning has got one of the most significant points inside advancement associations that are searching for creative approaches to use information advantages to help the business increase another degree of comprehension Why include machine learning into the mix With the appropriate machine learning models associations can constantly anticipate changes in the business with the goal that they are best ready to foresee what s straightaway As data is constantly added the machine learning models guarantee that the arrangement is continually refreshed The worth is direct If you utilize the most suitable and continually changing information sources with machine learning you have the chance to foresee what s to come Machine learning is a type of AI that empowers a framework to gain from data as opposed to through unequivocal programming Not with standing machine learning is certainly not a basic procedure

*Machine Learning Approaches for Urban Computing* Mainak Bandyopadhyay, Minakhi Rout, Suresh Chandra Satapathy, 2021-04-28 This book discusses various machine learning applications and models developed using heterogeneous data which helps in a comprehensive prediction optimization association analysis cluster analysis and classification related applications for various activities in urban area It details multiple types of data generating from urban activities and suitability of various machine learning algorithms for handling urban data The book is helpful for researchers academicians faculties scientists and geospatial industry professionals for their research work and sets new ideas in the field of urban computing

**Handbook of Research on Emerging Trends and Applications of Machine Learning** Solanki, Arun, Kumar, Sandeep, Nayyar, Anand, 2019-12-13 As today s world continues to advance Artificial Intelligence AI is a field that has become a staple of technological development and led to the advancement of numerous professional industries An application within AI that has gained attention is machine learning Machine learning uses statistical techniques and algorithms to give computer systems the ability to understand and its

popularity has circulated through many trades Understanding this technology and its countless implementations is pivotal for scientists and researchers across the world The Handbook of Research on Emerging Trends and Applications of Machine Learning provides a high level understanding of various machine learning algorithms along with modern tools and techniques using Artificial Intelligence In addition this book explores the critical role that machine learning plays in a variety of professional fields including healthcare business and computer science While highlighting topics including image processing predictive analytics and smart grid management this book is ideally designed for developers data scientists business analysts information architects finance agents healthcare professionals researchers retail traders professors and graduate students seeking current research on the benefits implementations and trends of machine learning

*Introduction And Fundamental Concepts Of Machine Learning* Dr. P. Sumithabhashini, Dr. Kasa Madhavi, Mr. Ramesh Alladi, Mr. Ch. Vijaya Kumar, 2022-12-13

The field of machine learning is gaining a lot of attention around the world both in the research community and in the business world Learning by machine is becoming increasingly important in many aspects of modern life Deep learning neural networks have been responsible for several recent technological advances including those in the fields of computer vision voice processing machine translation and reinforcement learning As a direct consequence of this neural networks have developed into an indispensable instrument in the toolset of every data scientist This book explains neural networks including what they are why they are effective algorithms and why they have the structure that they do It starts by discussing the fundamental elements that make up a neural network i e nodes weights activation functions biases and layers This book is meant to serve as an introduction to machine learning which is a field that is quickly becoming more significant in today s technological landscape Utilize to the fullest the vast potential that is afforded by various methodologies such as predictive analysis classifiers clustering and Natural Language Processing NLP Since mathematical expertise is required not only for describing the algorithms but also for demonstrating to the reader how and where to set the hyperparameters for maximum accuracy it is essential to have at least a surface level understanding of the subject matter This is because mathematical expertise is required It should not come as a surprise that there are far too many elements to this issue for all of them to be covered There are far too many facets to be included

*Machine Learning Applications in Non-Conventional Machining Processes* Bose, Goutam Kumar, Pain, Pritam, 2021-02-05

Traditional machining has many limitations in today s technology driven world which has caused industrial professionals to begin implementing various optimization techniques within their machining processes The application of methods including machine learning and genetic algorithms has recently transformed the manufacturing industry and created countless opportunities in non traditional machining methods Significant research in this area however is still considerably lacking Machine Learning Applications in Non Conventional Machining Processes is a collection of innovative research on the advancement of intelligent technology in industrial environments and its applications within the manufacturing field While highlighting topics including evolutionary

algorithms micro machining and artificial neural networks this book is ideally designed for researchers academicians engineers managers developers practitioners industrialists and students seeking current research on intelligence based machining processes in today s technology driven market

**Reshaping Environmental Science Through Machine Learning and IoT** Gupta, Rajeev Kumar,Jain, Arti,Wang, John,Pateriya, Rajesh Kumar,2024-05-06 In the face of escalating environmental challenges such as climate change air and water pollution and natural disasters traditional approaches to understanding and addressing these issues have yet to be proven sufficient Academic scholars are compelled to seek innovative solutions that marry digital intelligence and natural ecosystems Reshaping Environmental Science Through Machine Learning and IoT serves as a comprehensive exploration into the transformative potential of Machine Learning ML and the Internet of Things IoT to address critical environmental challenges The book establishes a robust foundation in ML and IoT explaining their relevance to environmental science As the narrative unfolds it delves into diverse applications providing theoretical insights alongside practical knowledge From interpreting weather patterns to predicting air and water quality the book navigates through the intricate web of environmental complexities Notably it unveils approaches to disaster management waste sorting and climate change monitoring showcasing the symbiotic relationship between digital intelligence and natural ecosystems This book is ideal for audiences from students and researchers to data scientists and disaster management professionals with a nuanced understanding of IoT ML and Artificial Intelligence AI

*Applied Machine Learning* M. Gopal,2019-06-07 Cutting edge machine learning principles practices and applications This comprehensive textbook explores the theoretical under pinnings of learning and equips readers with the knowledge needed to apply powerful machine learning techniques to solve challenging real world problems Applied Machine Learning shows step by step how to conceptualize problems accurately represent data select and tune algorithms interpret and analyze results and make informed strategic decisions Presented in a non rigorous mathematical style the book covers a broad array of machine learning topics with special emphasis on methods that have been profitably employed Coverage includes Supervised learning Statistical learning Learning with support vector machines SVM Learning with neural networks NN Fuzzy inference systems Data clustering Data transformations Decision tree learning Business intelligence Data mining And much more
