## Magazine Archives Readers Digest:

Empty Pleasures Carolyn de la Peña, 2010-09-27 Sugar substitutes have been a part of American life since saccharin was introduced at the 1893 World's Fair. In *Empty Pleasures* the first history of artificial sweeteners in the United States Carolyn de la Peña blends popular culture with business and women's history examining the invention, production, marketing, regulation, and consumption of sugar substitutes such as saccharin, Sucaryl, NutraSweet, and Splenda. She describes how saccharin, an accidental laboratory by-product, was transformed from a perceived adulterant into a healthy ingredient. As food producers and pharmaceutical companies worked together to create diet products, savvy women's magazine writers and editors promoted artificially sweetened foods as ideal, modern weight loss aids, and early diet plan entrepreneurs built menus and fortunes around pleasurable dieting made possible by artificial sweeteners. NutraSweet, Splenda, and their predecessors have enjoyed enormous success by promising that Americans, especially women, can have their cake and eat it too, but *Empty Pleasures* argues that these sweet cheats have fostered troubling and unsustainable eating habits and that the promises of artificial sweeteners are ultimately too good to be true.

**The Age of Stress** Mark Jackson, 2016-11-17 We are living in a stressful world yet despite our familiarity with the notion stress remains an elusive concept. In *The Age of Stress* Mark Jackson explores the history of scientific studies of stress in the modern world. In particular, he reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio-political and cultural as well as biological factors. Stress, he argues, is both a condition and a metaphor. In order to understand the ubiquity and impact of stress in our own times or to explain how stress has commandeered such a central place in the modern imagination, Jackson suggests that we need to comprehend not only the evolution of the medical science and technology that has gradually uncovered the biological pathways between stress and disease in recent decades but also the shifting social, economic, and cultural contexts that have invested that scientific knowledge with meaning and authority. In particular, he argues we need to acknowledge the manner in which enduring concerns about the effects of stress on mental and physical health are the product of broader historical preoccupations with the preservation of personal and political as well as physiological stability.

Securing the Prize Randall Fowler, 2024-11-14 How presidential metaphors have shaped US

discourse on the Persian Gulf From the 1970s to the 1990s American presidents and their advisers introduced four metaphors into foreign policy discourse that taught Americans to view the Persian Gulf as a vulnerable region and site of US responsibility on the world stage In *Securing the Prize: Presidential Metaphor and US Intervention in the Persian Gulf* Randall Fowler argues that for half a century metaphor has been central to defining America's role in the Middle East Metaphors served as shorthand for presidents to promote their policies filtering through the judgments of officials, journalists, experts and critics to mediate American perceptions of the Gulf War Tracing the use of security metaphors from President Richard Nixon to President George W. Bush Fowler revises mainstream understandings regarding the origins of the War on Terror and explains the disconnect between skeptical public attitudes toward US involvement in the Gulf War and the heavy American military footprint in the region
