Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach, Christoph Herrmann,2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas

Analysis and Identification of Time-Invariant Systems, Time-Varying Systems, and Multi-Delay Systems using Orthogonal Hybrid Functions Anish Deb,Srimanti Roychoudhury,Gautam Sarkar,2016-01-05 This book introduces a new set of orthogonal hybrid functions HF which approximates time functions in a piecewise linear manner which is very suitable for practical applications The book presents an analysis of different systems namely time invariant system time varying system multi delay systems both homogeneous and non homogeneous type and the solutions are obtained in the form of discrete samples The book also investigates system identification problems for many of the above systems The book is spread over 15 chapters and contains 180 black and white figures 18 colour figures 85 tables and 56 illustrative examples MATLAB

codes for many such examples are included at the end of the book
