Rehabilitation Linda M. Luxon, Rosalyn A. Davies, 1997 Clinicians, therapists and paramedical staff involved in caring for the
chronically dizzy patient will find this handbook invaluable. The authors discuss the physiologic basis for the clinical
observation that vestibular compensation occurs more rapidly and is more complete if the patient begins exercising as soon
as possible after a vestibular lesion. They provide a background in vestibular physiology and pathophysiology and include
several chapters on psychological and behavioral therapies which are important but often neglected components of the
management of the dizzy patient. Annotation copyrighted by Book News Inc. Portland, OR.
