**The Role of Culture in Social Media Marketing. A Systematic Literature Review** Nivedha Mahendran, 2019-03-11 Master's Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1 7 University of Bamberg language English abstract This present master thesis examines the role of culture on Social Media Marketing being a form of modern marketing and a bundle of marketing related activities using social media With the help of a systematic literature review answers are sought to the question as to which extent cultural differences influence the effectiveness of social media marketing The main objective is to adequately present the state of research on the interdisciplinary topic and to identify research gaps The findings from peer reviewed journals ascribe an indispensable value to the cultural component and illuminate the topic from different contemporary relevant perspectives The results indicate that social media marketing is generally covered from a cultural point of view Moreover the insights provide valuable knowledge from both consumers research perspective and from applied social media practices in multicultural settings However the findings also reveal

extant research gaps in several directions that need to be addressed in the near future to provide theoretical approaches and scientifically proven evidence on successful utilization of social media marketing in multicultural settings. The fact that social media plays an extremely important component in the worldwide dynamic technology development is an irrefutable fact. Companies are forced to integrate social media in the most diverse areas in order to be lucrative in the long term to save costs and to survive in competition. Typical fields of application include all departments that deal with external corporate communication e.g. HR for recruiting and talent acquisition, PR for professionally maintaining a favorable public image or in the marketing department as revolutionary marketing and sales platforms. According to a new study, 69% of marketing employees stated that marketing activities on social media helped to increase important marketing indicators and strengthen customer and brand loyalty. Nevertheless, social media offer great opportunities but also hold challenges. A major challenge is to choose the right medium which depends to a great extent on the target group.

**Language Learning Beyond the Classroom** Jocelyn Guevarra, 2026-03-05. Essay from the year 2026 in the subject Didactics - English course Language Teaching - language English abstract. This essay examines the role of social media in second language acquisition (SLA) situating its impact within established theories and empirical research. Drawing on Krashen's Input Hypothesis, Vygotsky's Sociocultural Theory and Wenger's Communities of Practice, it shows how platforms such as YouTube, TikTok, Instagram and Facebook provide authentic input, foster interaction and support identity construction. Empirical studies indicate that active participation in online communities enhances vocabulary, pragmatic competence, intercultural awareness and learner motivation. At the same time, challenges such as misinformation, distraction, fragmented learning and unequal access complicate its integration into formal pedagogy. The essay argues that social media functions as

a hybrid learning environment bridging formal and informal processes while reshaping learner autonomy and cultural participation By critically assessing both opportunities and limitations it underscores the need for pedagogical frameworks that help learners navigate digital spaces responsibly and inclusively Ultimately the essay contributes to debates in applied linguistics by positioning social media as a powerful yet complex force in language education with implications for practice equity and future research
