The Hyperboloidal Foliation Method Philippe G Lefloch, Yue Ma, 2014-11-27 The Hyperboloidal Foliation Method introduced in this monograph is based on a 3+1 foliation of Minkowski spacetime by hyperboloidal hypersurfaces This method allows the authors to establish global in time existence results for systems of nonlinear wave equations posed on a curved spacetime It also allows to encompass the wave equation and the Klein Gordon equation in a unified framework and consequently to establish a well posedness theory for a broad class of systems of nonlinear wave Klein Gordon equations This book requires certain natural null conditions on nonlinear interactions which are much less restrictive than the ones assumed in the existing literature This theory applies to systems arising in mathematical physics involving a massive scalar field such as the Dirac Klein Gordon systems
