The Journal of Education Thomas Williams Bicknell, Albert Edward Winship, Anson Wood Belding, 1928 Journal of Education, 1928 Environmental Education in Indonesia Lyn Parker, Kelsie Prabawa-Sear, 2019-08-08 Indonesia's wealth of natural resources is being exploited at breakneck speed and environmental awareness and knowledge among the populace is limited. This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast environmental destruction not only in Indonesia but also in the Global South more generally. Based on in-depth studies conducted in the cities of Yogyakarta and Surabaya complemented with surveys of students in secondary schools, *Environmental Education in Indonesia* examines educational curricula, pedagogy, and green activities to reveal what is currently being done in schools to educate children about the environment. The book investigates the shortcomings in environment education, including underqualified teachers, the civil service mentality, the still pervasive chalk and talk pedagogy, and the effect of the examination system. It also analyses the role of local government in supporting or not environmental education and the contribution of environmental NGOs. The book establishes that young people are not currently being exposed to effective environmental education and the authors propose that the best and most culturally appropriate way forward in Indonesia is to frame pro-environment behaviour and responsibility as a form of citizenship and specifically that environmental education should be taught as a separate subject. This book will be of great interest to students and scholars of contemporary Indonesia and Southeast Asia, education for sustainability and environmental education, as well as sustainability and sustainable development more generally. Garrison, 2012-12-06 Since 1979 when Richard Rorty's *Philosophy and the Mirror of Nature* appeared, there has been a flood of new scholarship on the philosophy of John Dewey. Surprisingly little of this scholarship has thus far made its way into the field of education where Dewey's philosophy has traditionally had a wide influence. Many of the authors of this collection are philosophers who have created some of the most original and influential work in this new scholarship. Five of them, Larry Hickman, Thomas M. Alexander, Raymond D. Boisvert, and J. E. Tiles, have written major books that have received wide international acclaim. Among the philosophers of education, some like Philip W. Jackson are among the best-known names in the entire international field and have kept pace with Deweyan scholarship for many years. Others are younger scholars who know the new scholarship well. Finally, two prominent feminists contribute important new work on Dewey, expanding the domain of the new scholarship on Dewey. One of them, Susan Laird, has had her work cited in the new biography of John Dewey by Robert Westbrook. **Educational Psychology for Teachers** Anita Woolfolk Hoy, Lorraine
