SYLLABUS

Description:

Analytics has been defined as the extensive use of data, statistical and quantitative analysis, explanatory and predictive models, and fact-based management to drive decisions and actions. Analytics is more than just analytical methodologies or techniques used in logical analysis. It is a process of transforming data into actions through analysis and insights in the context of organizational decision making and problem solving. Analytics includes a range of activities, including business intelligence, which is comprised of standard and ad hoc reports, queries and alerts, and quantitative methods, including statistical analysis, forecasting, extrapolation, predictive modeling (such as data mining), optimization and simulation.

Course Materials:

Selected readings and articles – distributed in class and/or posted online.

Software:
