San Diego Region I-V Charles Atwood Kofoid, 1906 Catalogue of books belonging to sir William Heathcote, bart., at
Hursley Park James Darling, 1834 **Curious Species** Whitney Barlow Robles, 2024-01-05 A compelling and innovative
exploration of how animals shaped the field of natural history and its ecological afterlives Can corals build worlds Do
rattlesnakes enchant What is a raccoon and what might it know Animals and the questions they raised thwarted human
efforts to master nature during the so called Enlightenment a historical moment when rigid classification pervaded the study
of natural history people traded in people and imperial avarice wrapped its tentacles around the globe Whitney Barlow
Robles makes animals the unruly protagonists of eighteenth century science through journeys to four spaces and ecological
zones the ocean the underground the curiosity cabinet and the field Her forays reveal a forgotten lineage of empirical inquiry
one that forced researchers to embrace uncertainty This tumultuous era in the history of human animal encounters still
haunts modern biologists and ecologists as they struggle to fathom animals today In an eclectic fusion of history and nature
writing Robles alternates between careful historical investigations and probing personal narratives These excavations of the
past and present of distinct nonhuman creatures reveal the animal foundations of human knowledge and show why tackling
our current environmental crisis first requires looking back in time **The Publishers' Circular and General Record of**
