United States 76 441 Ecommerce Trends Strategies For Small Business:

Handbook of Research on Current Trends in Asian Economics, Business, and Administration Akkaya,

Bülent, Jermittiparsert, Kittisak, Gunsel, Ayse, 2021-10-08 Social sciences have always been an important tool that enables human beings to examine and understand society. Through social sciences, researchers gain understandings of social phenomena and changes by providing commentaries, producing explanations, and attempting to synthesize a diversity of information sets to formulate theories. Since the concept of change has been the hallmark of the new millennium, researchers have witnessed a transformation in every aspect of the modern world at an ever-increasing speed, particularly in the social facet of human life. Ways of thinking that had previously been upheld and taught may therefore no longer be appropriate or effective as tools to understand contemporary phenomena and changes. The *Handbook of Research on Current Trends in Asian Economics, Business, and Administration* is a critical reference source that examines different aspects of social sciences, management, sociology, and education to better understand today's society and social life in the Asian context. The book identifies trends, impacts, and implications of disruptive technologies for business and socio-economic development, as well as strategic advantage on different levels of business and administration. Covering topics that include e-commerce, green management, information technology, economic growth, and distance learning, this book is essential for economists, academicians, government officials, policymakers, social scientists, managers, leaders, behavioral scientists, academicians, researchers, and students.

Becoming an Entrepreneur Susanne Weber, Fritz Oser, Frank Achtenhagen, Michael Fretschner, Sandra Trost, 2014-05-05 This book provides new insights into the important field of Entrepreneurship Education. The editors pick up Fayolle's invitation: How can we learn from institutional culture and translate it to a variety of aspects of learning to start up? From the perspective of Human Resource Education and Management, *Wirtschaftspädagogik*, the authors shed light into the socio-cultural system of entrepreneurship education. They start with mapping out its challenges. They discuss context factors like political regimes affecting entrepreneurial activities, consider goals including moral awareness, introduce ideas of modeling entrepreneurial and intrapreneurial competencies, suggest teaching/learning strategies, discuss evaluation procedures, and introduce case studies of entrepreneurship education in different countries for different study levels. All in all, this book stimulates and supports the challenges of educators, students, and practitioners, human resource managers, consultants, principals, teachers, and trainers to introduce into the varying contexts of entrepreneurship education content-specific, procedural, causal elements necessary for starting and maintaining an enterprise.
