Arizona's Instrument to Measure Standards (AIMS HS). Student Guide Arizona. State Department of Education, 2006

Arizona's Instrument to Measure Standards High School AIMS HS is an assessment program that measures high school students' achievement of the Arizona Academic Standards adopted by the state Board of Education in three subject areas: reading, writing, and mathematics. All students in high school are required to participate in AIMS HS testing. Test items were written to measure specifically the Standards Concepts and Performance Objectives described in the Arizona Academic Standards. Standards were articulated by grade level for reading and mathematics and approved by the state Board of Education in March 2003. Reading and mathematics items are multiple choice. There are no multiple choice questions on the writing test. Writing was articulated by grade level and approved by the state Board of Education in June 2004. There is an extended writing prompt that students will use to actively engage in the writing process. Students' writing is scored using the Six Trait Rubric (TM). Each of the Standards is built on a structured framework that spans kindergarten to twelfth grade, representing concepts and skills that the students have been learning since starting school. Within these Standards are the Concepts and Performance Objectives that are specific to each grade level. Although all Standards (reading, writing, and mathematics) are assessed each time AIMS is given, different Concepts and Performance Objectives are tested on different forms of the tests. Therefore, students need to be prepared for all Concepts and Performance Objectives in each Standard. This guide is divided into the three subject areas assessed on AIMS HS. It includes a short explanation of each testing format, hints for test taking, sample test questions, and a scoring guide for the written response. It does not teach students what they should know and be able to do to score well on the tests, but it will help them become familiar with the tests. This guide presents sections on: 1. AIMS HS FAQ, 2. Reading, 3. Writing, 4. Mathematics, 5. Scoring Keys, 6. Six Trait Writing Rubric, 7. AIMS HS Mathematics Reference Sheet, 8. Test Taking Strategies, and 9. a page for writing notes.

Collateral Damage Sharon L. Nichols, David C. Berliner, 2007-03-01. Drawing on their extensive research, Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system. For more than a decade, the debate over high stakes testing has dominated the field of education. This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests. Their analysis is grounded in the application of Campbell's Law, which posits that the greater the social consequences associated with a quantitative indicator, such as test scores, the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor. Nichols and Berliner illustrate both aspects of this corruption, showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system. Their analysis provides a coherent and comprehensive intellectual framework for the wide-ranging arguments against high stakes testing, while putting a compelling human face on the data marshalled in support of those
