Engineering management and information science is a comprehensive activity based on management science and engineering, using modern information technology and methods to collect, process, transmit, and utilize information with the aim of improving the efficiency and effectiveness of the organization and enhancing the overall operating effect of the organization. Current situation and problems: However, in the process of information engineering management, there have also been some problems such as inaccurate data, imperfect system functions, system security issues, and communication and collaboration issues. The previous two sessions have had heated discussions on this. This conference will focus more on the construction of information management platforms to improve management efficiency and economic efficiency. Aim and scope: EMIS2024 aims to gather professors, experts, scholars, and industrial pioneers from all over the world to exchange past experiences, new advances, and research results in the field of Engineering Management and Information Science. We sincerely hope that the conference will help advance knowledge in relevant scientific and academic fields. Researchers from Engineering Management and Information Science are invited to participate and submit their work to the program. Additionally, any work related to EMIS that has potential for usage in any of the fields is welcome. [Environment Conscious Manufacturing](#) Surendra M. Gupta, A.J.D.
