Interview With Sole Trader With Questions And Answers:

Inducing large-scale diffusion of innovation Ingrid Mignon, 2016-09-06 In order for the innovation process to be successful not only do innovations need to be developed and reached the market but once they are available for users they have to spread on a large scale In the innovation literature a complete explanation is lacking of why some innovations reach a phase of large scale diffusion faster than others including both actor and system level components For instance what drives and hinders adopters to decide to adopt the innovation on the actor and system levels and how adopters who participate in the largescale diffusion handle the adoption process and the implementation of the innovation are questions still unanswered As a consequence it remains unclear how the large scale diffusion process can be facilitated and speeded up This thesis addresses these issues by studying the case of renewable electricity RE innovations After decades of technology development and improvements RE innovations are now mature enough to be bought off the shelf by individuals and organizations Yet the pace of their large scale diffusion is still too slow for countries to reach their RE generation targets and to limit global warming Through qualitative and quantitative methods including 59 semi structured interviews with adopters project developers and experts in Sweden France and Germany as well as a survey sent to the whole population of RE adopters in Sweden an adopter perspective is taken in order to explore the adoption dynamics shaping large scale diffusion of innovation More specifically the thesis identifies the drivers and challenges of adoption during large scale diffusion and their impact on adoption decisions and strategies The outcome of this work is presented in a compiling synthesis and six appended papers Findings show that adopters are heterogeneous with regard to their characteristics as well as to the drivers challenges and strategies that affect their adoption processes Depending on their perceptions some adopters are more influenced by drivers and challenges than others and as a consequence adopters base their adoption decisions on different motives and follow different strategies to implement the innovation Moreover the results suggest that the dynamics that occur during the large scale diffusion process does not only come from the actor level and the level of the system where the largescale diffusion takes place but also from parallel systems which are related to adopters and their contexts including both the social networks and the industries they primarily belong This makes adopters the central drivers of the innovation diffusion process and this distinguishes the dynamics of large scale diffusion from the dynamics of innovation development and early diffusion in which the innovation is the central component Based on the findings about the adoption dynamics shaping large scale diffusion the thesis raises the need to consider large scale diffusion as part of a new system different from the innovation system and that acknowledges the specificities of this process A tentative model accounting for the central role of adopters and for the interactions between adopters the diffusion system and parallel systems is introduced Finally the implications of these findings for policy makers and managers are put forward In particular there is a need for policies acknowledging adopters heterogeneity as well as the new challenges of large scale diffusion Strategies developed by adopters can be a source of

inspiration for policy makers who can for instance promote the use of intermediaries of adopters task environment and networks as well as the formation of coalitions among adopters [Handbook of Research on Approaches to Alternative Entrepreneurship Opportunities](#) Dantas, José Guilherme Leitão, Carvalho, Luísa Cagica, 2020-02-25 In some cases technology based projects have revolutionized the way of living by contributing to job and wealth creation These types of ventures regardless of their outstanding relevance are the exception rather than the norm in that they account for only a very small percentage of entrepreneurial activity Although not ignoring these important ventures the main goal of this title is to fully unleash the wide potential of the entrepreneurial activity exploring and highlighting the somewhat hidden part which is ultimately responsible for the largest part of new businesses and as a consequence for the wellbeing of millions of people virtually everywhere The Handbook of Research on Approaches to Alternative Entrepreneurship Opportunities is a collection of innovative research on the methods and applications of entrepreneurial activity beyond the traditional boundaries of entrepreneurship research While highlighting topics including collective business organizational performance and generational differences this book is ideally designed for entrepreneurs developers researchers business managers industry professionals academicians and students seeking to draw attention to distinctive and multifaceted types of entrepreneurship
