Journal of the Institution of Engineers (India). ,1993 Food Process Engineering And Technology Akash Pare, B.L. Mandhyan, 2011-01-01 Food Process Engineering focuses on the design operation and maintenance of chemical and other process manufacturing activities The development of Agro Processing will spur agricultural diversification There are several

benefits of promoting small scale agro processing units rather large scale for the promotion of rural entrepreneurship
Appropriate post harvest management and value addition to agricultural products in their production catchments will lead to employment and income generation in the rural sector and minimize the losses of harvested biomass Adoption of suitable technology plays a vital role in fixing the cost of the final product and consequently makes the venture a profitable one It is observed that imported agro processing machines or their imitations are used for preparing food products Actually the working of these machines should be critically studied in context of the energy input and the quality of the finished product
