Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your

reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well Architect to English Chad Pryor,2017-02-04 As with any profession architects have a specific way of communicating When talking with potential clients architects have a way of trying to dazzle with elegant phrases and informed jargon That same talent can also be one of our biggest flaws Through the heavy use of idioms metaphors and unintentionally hilarious comparisons we sometimes struggle to communicate clearly I began writing down some of the things I overheard in meetings around the office and with design colleagues Throughout the book I've written the quote said by an architect along with the non architect English translation The illustrations in this book are sometimes a satirical response to the quote Most times the illustrations are based on my experiences of being a 20 30 something year old participating in and observing the latest urban trends The Millennial version of keeping up with the Joneses has become about who can try the trendiest food spot travel the most places and have the most jealously inducing social media post I myself am a hipster according to most standards I am also an architect So all of the content is aimed at me as much as anyone else Don't take this too seriously and don't get all butt hurt over it
