Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained. The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace. Unfortunately the story is not the same for construction organisations in developing economies. While some organisations might be willing to be digitally transformed most have no clue how to go about it. To this end this book provides guidelines for construction organisations seeking to transform their entities digitally. Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities. Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members. Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries.

Sixth Central Pay Commission, 2008 **China and the Internet** Song Shi, 2023-12-15. Two oversimplified narratives have long dominated news reports and academic studies of China's Internet: one lauding its potentials to boost commerce, the other bemoaning state control and measures against the forces of political transformations. This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the diversity of Internet related phenomena. *China and the Internet* analyzes how Chinese activists, NGOs and government offices have used the Internet to fight rural malnutrition, the digital divide, the COVID-19 pandemic and other urgent problems affecting millions of people. It presents five theoretically informed case studies of how new media have been used in interventions for development and social change, including how activists battled against COVID-19. In addition, this book applies a Communication for Development approach to examine the use and impact of China's Internet. Although it is widely used
