Fugle,2015-01-01 Battles over creation or evolution have been perpetuated for years by vocal Christians and scientists alike

But conflict has never been the only choice *Laying Down Arms to Heal the Creation Evolution Divide* presents a comprehensive uplifting alternative that brings together an orthodox biblical view of a sovereign Creator God and the meaningful discoveries of modern evolutionary biology Gary Fugle offers unique insights into this debate from his dual perspective as both an award winning biology professor and a committed leader in conservative evangelical churches In focusing on the stumbling blocks that surround creation and evolution debates Fugle sensitively addresses the concerns of skeptical Christians and demonstrates how believers may celebrate evolution as a remarkable aspect of God s glory He describes how the mainstream scientific community as well as numerous Christians may alter current approaches to eliminate conflicts He explains conservative readings of early Genesis that respect both the inerrant words of Scripture and the evolutionary revelations in God s natural creation This book is for individuals who sense that biblical Christian faith and evolution are compatible without compromising core convictions If given good reasons to do so are we willing to lay down our arms to affirm an encompassing vision for the future

Hilma af Klint Julia Voss, 2022-10-19 A highly anticipated biography of the enigmatic and popular Swedish painter The Swedish painter Hilma af Klint 1862-1944 was forty-four years old when she broke with the academic tradition in which she had been trained to produce a body of radical abstract works the likes of which had never been seen before Today it is widely accepted that af Klint was one of the earliest abstract academic painters in Europe But this is only part of her story Not only was she a working female artist she was also an avowed clairvoyant and mystic Like many of the artists at the turn of the twentieth century who developed some version of abstract painting af Klint studied Theosophy which holds that science art and religion are all reflections of an underlying life form that can be harnessed through meditation study and experimentation Well before Kandinsky Mondrian and Malevich declared themselves the inventors of abstraction af Klint was working in a nonrepresentational mode producing a powerful visual language that continues to speak to audiences today The exhibition of her work in 2018 at the Guggenheim Museum in New York City attracted more than 600,000 visitors making it the most attended show in the history of the institution Despite her enormous popularity there has not yet been a biography of af Klint until now Inspired by her first encounter with the artist's work in 2008 Julia Voss set out to learn Swedish and research af Klint's life not only who the artist was but what drove and inspired her The result is a fascinating biography of an artist who is as great as she is enigmatic *Catalog of the Library of the Academy of Natural Sciences of Philadelphia* Academy of Natural Sciences of Philadelphia.
