Desperately Seeking Asylum Helen T. Boursier, 2019-11-19 Told through heart wrenching testimonies photographs and artwork of refugees fleeing their homelands

Desperately Seeking Asylum describes firsthand accounts of the harrowing and dangerous journey immigrants are willing to endure knowing that they might not even make it onto US soil. Desperately Seeking Asylum prioritizes the testimonies of refugee families and unaccompanied children who are seeking asylum in the United States from Central America primarily Guatemala, El Salvador, and Honduras. Their desperate and heart-wrenching stories disclose why they fled their homelands, their experiences along the treacherous overland journey, and the harsh reality of how the United States treats these families and children upon arrival to the United States. It critiques US complicity to the violence they are fleeing and discloses how national leadership shapes US immigration policies and practices, including the blatant documented violations against asylum seekers at the US-Mexico border. Most notably, it offers transparency on US immigration practices at the US-Mexico border which violate existing US and international laws that are intended to protect asylum seekers, including the current official practice of blocking bridges with turnbacks to prevent inadmissibles from applying for asylum in the United States. It explains protections mandated by US law for unaccompanied children who are in US custody and discloses violations which keep these children detained excessive lengths of time in substandard for-profit facilities which are overseen by the government and funded by taxpayers. Boursier also deconstructs the complicated asylum process, including examining the credible fear for asylum procedure, showing how technical terms and language are used to justify injustice at the border. Desperately Seeking Asylum offers hope for a new vision with alternative options and practical actions which assist migrants through humanitarian aid on both sides of the border. The witness for compassionate and responsible response by people of conscious becomes an antidote to injustice against asylum seekers. Instead of the current administration manipulating US laws to support its ulterior motives and political agenda, Boursier asks readers to hold US elected officials accountable to the same Rule of Law that the United States demands of refugees. Ultimately, Boursier suggests a spectrum of options for practical ways to make the political personal through public witness and civic engagement to transform the broken immigration process for refugees who are desperately seeking asylum.

Routledge Handbook of Nuclear Proliferation and Policy

Joseph Pilat, Nathan Busch, 2015-05-15. This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts. Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. 5 How would you respond to a data breach incident
Example Answer In the event of a data breach incident my first priority would be to contain the breach and minimize further damage I would immediately alert the appropriate stakeholders including senior management legal counsel and IT security personnel and activate the organization's incident response plan This may involve isolating affected systems shutting down compromised accounts and implementing temporary measures to prevent unauthorized access Next I would initiate a thorough investigation to determine the scope and impact of the breach identify the root cause and assess the extent of data exposure This may involve forensic analysis log reviews and collaboration with law enforcement and regulatory agencies Once the breach has been contained and the initial investigation is complete I would work with cross functional teams to remediate vulnerabilities restore affected systems and data and implement measures to prevent similar incidents from occurring in the future I would also communicate transparently with affected parties including customers employees and regulatory authorities and take steps to mitigate any potential harm or reputational damage Finally I would conduct a post incident review to evaluate the effectiveness of the response identify lessons learned and make recommendations for improving the organization's incident response capabilities moving forward
