Geoinformatics A. Krishna Sinha, 2006-01-01 The science of informatics in the broadest sense has been several

thousands of years in the making With the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries Coupling this computational capability with earth science data defines the emerging field of geoinformatics Since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology As disciplinary information about Earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems Twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology Readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics Publisher s website
