psychological and sociological studies of self concept and self esteem Looking at a plethora of tests Wylie found in 1974 that very few had been adequately conceived or implemented Many produced results that were unverifiable or specious Her findings had disturbing implications not only for the tests themselves but for substantive research based upon them In the 1980s psychometric tests of self concept have continued to proliferate Wylie has continued to assess them Measures of Self Concept briefly summarizes the psychometric criteria for self concept tests as fully discussed in Wylie s 1974 book and the present general state of methodological adequacy of currently used earlier tests and some promising new ones still under development Although Wylie still finds serious shortcomings she notes a greater attempt today to increase and evaluate the validity of self concept indices This book presents detailed up to date information about and psychometric evaluations of ten self concept tests that appear to be the most meritorious candidates for current use and for further research and development It is the first book since her 1974 volume to review specific as well as general measures of self esteem for a range of ages from preschool to adult

Self-Concept John Hattie,2014-03-05 The aim of this book is to discuss the notions of self concept self esteem and related terms from an educational and psychological perspective Specifically this book is concerned with developing a model of self concept and corollaries to this model that assesses the dimensionality of self concept reviews tests of self concept discusses the relationship between self concept and other variables particularly achievement describes the development of self concept and evaluates programs to enhance self concept Throughout this volume emphasis is placed on ordering the many studies using recent methodological advances such as meta analysis and the analysis of covariance structures After detailing a conceptual model of self concept the book offers various experimental and statistical discussions of the model Unlike many other models the claim is not that this model is the correct one but that it may serve as a useful coathanger until a better one is devised

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him.
