Seventh National Development Plan 2017 2021:

Operationalizing integrated landscape approaches in the tropics Reed, J., Ros-Tonen, M.A.F., Sunderland, T.C.H., 2020-10-29

Poverty, food insecurity, biodiversity, and habitat loss are persistent global challenges that are further exacerbated by the impacts of climate change. These challenges are particularly hard felt in the tropical landscapes of the global South where tensions between local socio-economic and international environmental commitments are pervasive. Due to the apparent failure of sectorial approaches to address such challenges, more holistic strategies are being increasingly promoted. Integrated landscape approaches are one such example, essentially a governance strategy that engages multiple stakeholders to reconcile societal and environmental objectives at the landscape scale to identify trade-offs and potential synergies for more sustainable and equitable land management. Integrated landscape approaches have been widely endorsed in the international and national policy arena, within academia, and in the discourse surrounding conservation and development funding. However, despite strong scientific theories and concepts, the implementation and particularly evaluation and reporting of integrated landscape approaches in the tropics remains poorly developed. The COLANDS initiative represents an explicit attempt to contribute towards the evidence base by operationalizing integrated landscape approaches in Ghana, Zambia, and Indonesia. In this regard, we aim to provide regular, honest reporting of progress. This book details the experiences of researchers engaged in these landscape-scale initiatives across the first two years of implementation. With dedicated chapters on current progress, biodiversity methods, and evaluation, the book provides useful tools and resources for research and implementation. Furthermore, we consider the complex socio-political challenges associated with landscape approaches, with chapters focussed on how to effectively engage stakeholders and understand the national policy environment. We then provide profiles of the sites in each of the three countries and describe the historical context, current status, and potential for more integrated landscape governance. This book explores the techniques and strategies that can be deployed to improve the governance and management of land and natural resources and better reconcile conservation and development objectives in tropical landscapes undergoing rapid change.

The Oxford Handbook of the Zambian Economy, 2024-08-23 This handbook offers a comprehensive and authoritative account of the Zambian economy including past and current trends The Zambian economy has evolved from simple and fragmented agrarian activities at the turn of the 20th Century into a wide range of organized and regulated modern economic activities today While the economy has largely revolved around the mining industry since the early 1920s when the extraction of copper and other mineral ores on the Copperbelt begun there has been a gradual broadening of economic activities over time with services now accounting for almost two thirds of gross domestic product GDP This book shows that since colonial times one of the persistent items on the economic development agenda in what is today known as Zambia has been the need to diversify the economy to reduce dependence on mining in terms of foreign exchange earnings and public revenue While the need to diversify the economy has been well acknowledged by successive Zambia governments including the current government achieving this goal has proved to be elusive so far By presenting a collection of well researched and empirically supported chapters on the key areas of the Zambian economy this volume gives readers a good sense of where the Zambian economy has come from where it is at the moment but also highlights the challenges and prospects for economic growth

Shareholder Primacy and Global Business Lela Mélon, 2019-03-13 In the context of growing public interest in sustainability Corporate Social Responsibility CSR has not brought about the expected improvement in terms of sustainable business Self regulation has been unable to provide appropriate answers for unsustainable business frameworks despite empirical proof that sustainable behaviour is entirely in corporate enlightened self interest The lack of success of the soft law approach suggests that hard law regulation may be needed after all This book discusses these options alongside the issue of shareholder primacy and its externalities in corporate social and natural environment To escape the prisoner s dilemma European corporations and their global counterparts have found themselves in help is needed in the form of EU hard law to advocate sustainability through mandatory rules This book argues that the necessity of these laws is based on the first mover s advantage of such corporate law approach towards sustainable development In the current EU law environment where codification of corporate law is sought for forming and defining a general EU policy could not only help corporations embrace this self enlightened behaviour but could also build the necessary EU corporate citizenship atmosphere Considering the developments in the field of CSR as attempts to mitigate negative externalities resulting from inappropriate shareholder primacy use the book is centred around a discussion of the shareholder primacy paradigm its legal position and its unsuitability for modern global business Going beyond solely legal analysis juxtaposing legal principles and argumentation with economic theoretic approaches and more importantly real life examples this book is accessible to both professionals and academics working within the fields of business economics corporate governance and corporate law

Digital Surveillance in Southern Africa Allen Munoriyarwa, Admire Mare, 2023-01-01 This book critically examines the manifest and latent practices of surveillance in the southern African region using case studies from South Africa Zimbabwe Zambia Namibia Botswana and Mozambique The book demonstrates the growing role of super powers in the construction and normalization of the surveillance state It traces the digitization of surveillance practices to the rapid adoption of smart CCTV facial recognition technologies and EMSI catchers Through predictive policing mechanisms state security agencies have appropriated digital media technologies for sentiment analysis constant monitoring of digital footprints of security targets and even deploying cyber troops on popular social media platforms The authors argue that surveillance practices have thus

been digitized with deleterious impact on the right to privacy peaceful assembly and freedom of expression in the region Furthermore they argue that specific laws and regulations governing surveillance practices in the region are lagging behind Finally the book demonstrates how digital surveillance have significantly infiltrated the political economic and social fabric of Southern Africa This book provides much needed systematic cutting edge research into the trends practices policies and geo political interests at the center of surveillance practices in the region providing a crucial link between human rights such as freedom of privacy and expression and political authoritarianism

The Nation That Fears God Prospers Chammah J.

Kaunda,2019-01-15 Through its strength in numbers and remarkable presence in politics Pentecostalism has become a force to reckon with in twenty first century Zambian society Yet some fundamental questions in the study of Zambian Pentecostalism and politics remain largely unaddressed by African scholars Situated within an interdisciplinary perspective this unique volume explores the challenge of continuity in the Zambian Pentecostal understanding and practice of spiritual power in relation to political engagement Chammah J Kaunda argues that the challenge of Pentecostal political imagination is found in the inculturation of spiritual power with political praxis The result of this inculturation is that Zambian Pentecostals sacralize the political authority of state power through the charisma of the national president and other major political personalities It has also contributed to the construction of Zambian Pentecostal leadership that is deified rather than leadership that is formed through the struggles and experiences of the marginalized and powerless Kaunda argues that the solution does not lie either in desacralization of powers or the separation between the church and the state but rather in rethinking the Christ event as a paradigm for the recovery of Pentecostalism s sociopolitical prophetic dynamism
