Donnelly,2023-01-01 This book reconsiders audiovisual culture through a focus on human perception with recourse to ideas derived from recent neuroscience It proceeds from the assumption that rather than simply working on a straightforward cognitive level audiovisual culture also functions more fundamentally on a physiological level directly exploiting precise aspects of human perception Vision and hearing are unified in a merged signal in the brain through being processed in the same areas This is illustrated by the startling McGurk Effect whereby the perception of spoken sound is changed by its accompanying image and counterpart effects which demonstrate that what we see is affected by different sounds accompanying sounds This blending of sound and images into a whole has become a universal aspect of culture not only evident in films and television but also in video games and short Internet clips Indeed this aesthetic formation has become the dominant of this period The McGurk Universe attends to how audiovisual culture engages with and mediates between physiological and psychological levels **Hearing Eyes, Seeing Ears** K.J. Donnelly,2025-01-22 This book approaches music in audiovisual culture as a complex merged signal rather than as a simple addition to the images of film The audiovisual is central to modern culture with screens and speakers including headphones dominating communication leisure and drama While this book mostly addresses film it also deals with sister media such as television and video games

registering that there is a common core of synchronized image and sound at the heart of these different but related media. The traditions of sound and what Michel Chion calls audiovision (1994) including principles of accompaniment and industrial processes from film have been retained and developed in other media. This book engages with the rich history and varied genres, different traditions and variant strategies of audiovisual culture. However, it also points to and emphasizes the common core of flat moving images and synchronized sound and music which marks a dominant in electronic media culture, what might be called screen and speaker diaphragm culture. Addressing music as both diegetic and non diegetic, as both songs and score, the analyses presented in this book aim to attend the precise interaction between music and other elements of audiovisual culture as defining overall configurations. While many writings about music in audiovisual culture focus on what it communicates, its processes are more complicated and can form a crucial semi-conscious or perhaps unconscious background. While music's effect might be far from simple and unified, part of screen music's startling effect comes from its unity with the image. Cross-modal crosstalk between sound and image forms a whole new signal of its own. Each chapter marks a case study, making for a varied collection that embraces rich history and different traditions, as well as the distinct aesthetic boldness of different genres and formats.

The Palgrave Handbook of Sound Design and Music in Screen Media
Liz Greene, Danijela Kulezic-Wilson, 2016-12-14

This book bridges the existing gap between film sound and film music studies by bringing together scholars from both disciplines who challenge the constraints of their subject areas by thinking about integrated approaches to the soundtrack. As the boundaries between scoring and sound design in contemporary cinema have become increasingly blurred, both film music and film sound studies have responded by expanding their range of topics and the scope of their analysis beyond those traditionally addressed. The running theme of the book is the disintegration of boundaries which permeates discussions about industry, labour, technology, aesthetics and audiovisual spectatorship. The collaborative nature of screen media is addressed not only in scholarly chapters but also through interviews with key practitioners that include sound recordists, sound designers, composers, orchestrators and music supervisors who honed their skills on films, TV programmes, video games, commercials and music videos.
