Spiritual Being & Becoming Eric J. Kyle, 2015-03-06 It is reported that there are as many as 100 billion neurons that make up the human nervous system. This system is incredibly complex and yet it is a fundamental part of what makes us who we are. Yet there is far more to human beings than biology. Many academic disciplines study the human condition and there are many schools of thought within that study. We must also appreciate that the study of human nature did not begin in contemporary times. History, particularly Western Christian history, is full of texts that offer detailed explorations of the human condition. However, no consensus has yet emerged. Consensus or not, those working towards religious and spiritual formation are tasked with pursuing the transformation of their communities. This book is an attempt to provide some of the background to support this ministerial work. It seeks not only to offer a fuller understanding of some of the common views of human nature but also insights into how we might utilize this knowledge in our ministries. Ministries that strive towards the spiritual being and becoming of our world.
