

Classroom Observation and Reflection Paper

Classroom Observation and Reflection Paper MTE/501 The Art of Science and Teaching Regis Lawrence For my classroom observation I had the opportunity of sitting in on a first grade regular education classroom. Listed below are the following that relates to the teacher's classroom design. Teacher's educational goals I asked for the teachers educational goals and wasn't surprised that our goals shared some of the same objectives. In terms of teaching she wanted to provide the best education possible and go over and beyond the call of duty to make that a reality, without excuses. Should a student need additional tutorial assistance due to performing below grade level she would set up a schedule to make those accommodations. ...show more content...

Keeping the standards in a designated area is there for anyone (administrators) to come into the class and see what you are working on. Each day she would have a student read the standard that would be covered that day. The learning objectives were kept in plain sight on a sentence strip. Teaching Methods Throughout the lesson she would walk around and interact with the students to make sure they were on task and understanding the assignment. She provided visual aids to assist in the lesson and allowed students to pair with each other in order to provide extra help. Students had to sit up straight in class and track the teacher while she was at the board during whole group instruction. One thing I really loved because it's something I do in my classroom. All students were required to raise their hands when asked to respond to a question regarding the lesson. Use of technology as a resource It is really amazing how excited students get with the possibility of using the computer in the classroom to assist them with their lesson. The teacher added that she uses it as a reward system, stating how affective it is in maintaining order and control in the classroom. Students knew how to navigate, go to various websites that were related to the lesson and create a folder in which to put their assignments in. .

Cox,Theresa Kwong,Lisa Ying Ngor Law,Mark Andrew Pegrum,2022-09-21 [The Reliability of Classroom Observations by School Personnel. Research Paper. MET Project](#) Andrew D. Ho,Thomas J. Kane,2013 For many teachers the classroom observation has been the only opportunity to receive direct feedback from another school professional As such it is an indispensable part of every teacher evaluation system Yet it also requires a major time commitment from teachers principals and peer observers To justify the investment of time and resources a classroom observation should be both accurate and reliable In this paper the authors evaluate the accuracy and reliability of school personnel in performing classroom observations The authors also examine different combinations of observers and lessons observed that produce reliability of 0 65 or above when using school personnel They asked principals and peers in Hillsborough County Florida to watch and score videos of classroom teaching for 67 teacher volunteers using videos of lessons captured during the 2011 12 school year Each of 129 observers provided 24 scores on lessons provided to them yielding more than 3 000 video scores for this analysis The authors briefly summarize seven key findings 1 Observers rarely used the top or bottom categories unsatisfactory and advanced on the four point observation instrument 2 Compared to peer raters administrators differentiated more among teachers 3 Administrators rated their own teachers 0 1 points higher than administrators from other schools and 0 2 points higher than peers 4 Although administrators scored their own teachers higher their rankings were similar to the rankings produced by others outside their schools 5 Allowing teachers to choose their own videos generated higher average scores However the relative ranking of teachers was preserved whether videos were chosen or not 6 When an observer formed a positive or negative impression of a teacher in the first several videos that impression tended to linger and 7 There are a number of different ways to ensure reliability of 0 65 or above The authors conclude by discussing the implications for the design of teacher evaluation systems in practice Contains 7 figures 10 tables and 21 footnotes
