Z User Workshop, York 1991 J. E. Nicholls, 2012-12-06 In ordinary mathematics an equation can be written down which is syntactically correct but for which no solution exists For example consider the equation $x^2 = 1$ defined over the real numbers there is no value of x which satisfies it Similarly it is possible to specify objects using the formal specification language Z which can not possibly exist Such specifications are called inconsistent and can arise in a number of ways Example 1 The following Z specification of a function f from integers to integers $f(x) = 1$ if $x = 0$ $f(x) = 2$ if $x = 1$ is inconsistent because axiom i gives $f(0) = 1$ while axiom ii gives $f(0) = 2$ This contradicts the fact that f was declared as a function that is f must have a unique result when applied to an argument Hence no such f exists Furthermore iff $f(0) = 1$ and $f(0) = 2$ then $1 = 2$ can be deduced From $1 = 2$ anything can be deduced thus showing the danger of an inconsistent specification Note that all examples and proofs start with the word Example or Proof and end with the symbol \square

Shifting Paradigms in Software Engineering Roland Mittermeir, 2012-12-06 Object orientation and the need for multi paradigmatic systems constitute a challenge for researchers practitioners and instructors Presentations at the OCG NJSZT joint conference in Klagenfurt Austria in September 1992 addressed these issues The proceedings comprise such topics as project management artificial intelligence modelling aspects artificial intelligence tool building aspects language features object oriented software development the challenge of coping with complexity methodology and experience software engineering education science policy etc

Software Specification Methods Henri Habrias, Marc Frappier, 2013-03-01 This title provides a clear overview of the main methods and has a practical focus that allows the reader to apply their knowledge to real life situations The following are just some of the techniques covered UML Z TLA SAZ B OMT VHDL Estelle SDL and LOTOS

A Structured Approach to Systems Development Gary Heap, John Stanway, Alfie Windsor, 1992 This book covers the software lifecycle from initial concept at a corporate strategy level through the specification development of individual systems to system replacement The reader is thus given a complete integrated set of procedural structural documentation quality standards to encompass the software development lifecycle The book is unique in addressing the software lifecycle from fuzzy concept through to system replacement because it can utilize any proprietary method for analysis design it is applicable to all organizations IT professionals

Advanced Information Systems Engineering Klaus R. Dittrich, Andreas Geppert, Moira C. Norrie, 2003-05-15 Since the late 1980s the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering CAiSE 2001 was the 13th conference in this series and was held from 4th to 8th June 2001 in the resort of Interlaken located near the three famous Swiss mountains the Eiger Mönch and Jungfrau The first two days consisted of pre-conference workshops and tutorials The workshop themes included requirements engineering evaluation of modeling methods data integration over the Web agent oriented information systems and the design and management of data

warehouses Continuing the tradition of recent CAiSE conferences there was also a doctoral consortium The p conference tutorials were on the themes of e business models and XML appli tion development The main conference program included three invited speakers two tuto als and a panel discussion in addition to presentations of the papers in these proceedings We also included a special practice and experience session to give presenters an opportunity to report on and discuss experiences and investigations on the use of methods and technologies in practice We extend our thanks to the members of the program committee and all other referees without whom such conferences would not be possible The program committee whose members came from 20 di erent countries selected 27 hi quality research papers and 3 experience reports from a total of 97 submissions The topics of these papers span the wide range of topics relevant to information systems engineering from requirements and design through to implementation and operation of complex and dynamic systems
