students with the details of Java's Abstract Windowing Toolkit (AWT). To overcome this dilemma, the text comes with a software package, BreezySwingO, which simplifies the programming of GUIs. BreezySwing insulates students from the complex details of laying out window components and responding to interface events. Lambert and Osborne's book and software package enable students to enjoy the excitement of writing GUI-based programs without being overwhelmed by or distracted from the more basic issues of algorithm design and the factoring of programs into classes. The University Edition of Borland's JBuilder 4 is packaged with the text *College Mathematics for Business, Economics, Life Sciences and Social Sciences* by Raymond A. Barnett, Michael R. Ziegler, and Karl Byleen, 2008. Designed to be accessible, this book develops a thorough functional understanding of mathematical concepts in preparation for its application in other areas. It concentrates on developing concepts and ideas followed immediately by developing computational skills and problem solving. Features a collection of important topics from mathematics of finance, algebra, linear programming, probability, and descriptive statistics with an emphasis on cross-discipline principles and practices. For the professional who wants to acquire essential mathematical tools for application in business, economics, and the life and social sciences.
