**International Handbook of Internet Research** Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation

**Citizen Journalism** Melissa Wall,2018-12-20 Citizen Journalism explores citizen participation in the news as an evolving disruptive practice in digital journalism This volume moves beyond the debates over the mainstream news media attempts to control and contain citizen journalism to focus attention in a different direction the peripheries of traditional journalism Here more independent forms of citizen journalism

enabled by social media are creating their own forms of news. Among the actors at the boundaries of the professional journalism field the book identifies are the engaged citizen journalist and the enraged citizen journalist. The former consists of under-represented voices leading social justice movements while the latter reflects the views of conservatives and the alt-right who often view citizen journalism as a performance. Citizen Journalism further explores how non-journalism arenas such as citizen science enable ordinary citizens to collect data and become protectors of the environment. Citizen Journalism serves as an important reminder of the professional field's failure to effectively respond to the changing nature of public communication. These changes have helped to create new spaces for new actors in such places traditional as well as upstart forms of journalism negotiate and compete ultimately aiding the journalism field in creating its future.

Public Journalism 2.0 Jack Rosenberry, Burton St John, 2009-12-16 Where does journalism fit in the media landscape of blogs, tweets, Facebook postings, YouTube videos and literally billions of Web pages? Public Journalism 2.0 examines the ways that civic or public journalism is evolving especially as audience-created content, sometimes referred to as citizen journalism or participatory journalism, becomes increasingly prominent in contemporary media. As the contributors to this edited volume demonstrate, the mere use of digital technologies is not the fundamental challenge of a new citizen-engaged journalism; rather, a deeper understanding of how civic/public journalism can inform citizen-propelled initiatives is required. Through a mix of original research, essays, interviews, and case studies, this collection establishes how public journalism principles and practices offer journalists, scholars, and citizens insights into how digital technology and other contemporary practices can increase civic engagement and improve public life. Each chapter concludes with pedagogical features including Theoretical Implications highlighting the main theoretical lessons from each chapter, Practical Implications applying the chapter's theoretical findings to the practice of citizen-engaged journalism, and Reflection Questions prompting the reader to consider how to extend the theory and application of the chapter. Blogging and other participatory journalism practices enabled by digital technology are not always in line with the original vision of public journalism which strives to report news in such a way as to promote civic engagement by its audience. Public Journalism 2.0 seeks to reinvent public journalism for the 21st century and to offer visions of how digital technology can be enlisted to promote civic involvement in the news.

International Journal of Linguistics and Communication ,2016      **Cyberactivism and Citizen Journalism in Egypt** Courtney C. Radsch,2016-09-23 This compelling book explores how Egyptian bloggers used citizen journalism and cyberactivism to chip away at the state s monopoly on information and recalibrate the power dynamics between an authoritarian regime and its citizens When the Arab uprisings broke out in early 2011 and ousted entrenched leaders across the region social media and the Internet were widely credited with playing a role particularly when the Egyptian government shut down the Internet and mobile phone networks in an attempt to stave off the unrest there But what these reports missed were the years of grassroots organizing digital activism and political awareness raising that laid the groundwork for this revolutionary change Radsch argues that Egyptian bloggers created new social movements using blogging and social media often at significant personal risk so that less than a decade after the information revolution came to Egypt they successfully mobilized the overthrow of the state and its president
