## **Error Analysis And Second Language Acquisition:**

**Error Analysis** Jack C. Richards, 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of interlanguage and the influence of external factors on the process of language learning to the development of syntax and the methodology of error analysis Collectively they provide a valuable perspective on the learning process which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills *Error Analysis in New Language Acquisition* Andrea Letzel, 2016-11-17 Studienarbeit aus dem Jahr 2010 im Fachbereich Anglistik Linguistik Note 1,3 Johannes Gutenberg Universität Mainz Sprache Deutsch Abstract Error Analysis used in second language analysis studies the errors learners make in speech and writing It also studies the different types of errors and why they were made In this term paper two different types of learners will be considered who perform spontaneously with the help of a picture story There will be a special focus on the differences and similarities of their errors There are various possibilities how samples of learner language can be influenced Firstly the learner and his proficiency level have to be described and it is important if he speaks or learns other languages irrespective of the MT and the target language that is considered in the analysis The way of instruction plays also an important role because instructed language learning provides a different error background as if the learner tries to learn the language naturalistically The second part that has to be described is the language itself The medium can either be oral or written Generally the oral production consists of a more colloquial English for the simple reason that the learner has not as much time to think about formulation than in written speech Therefore the Genre and the content of the language production is Error Evaluation and Error correction are additional parts that have not to be included in every Error Analysis According to the dictionary of Linguistics the error analysis is subdivided and classified in modality levels of linguistic description form type and cause **Error Analysis and Interlanguage** Stephen Pit Corder, 1981 [Error Analysis in SLA. An Investigation of Errors made by Polish Learners of English](#) Tom Keller, 2016-04-13 Seminar paper from the year 2010 in the subject English Language and Literature Studies Linguistics grade 3,0 Technical University of Braunschweig Englisch Seminar course Second Language Acquisition language English abstract In this paper I will investigate several language productions from Polish learners using the English language and try to uncover their errors Using Error Analysis I will describe and explain the reasons for the error production An interesting question will be whether the Polish speakers may have typical errors which could be related to their native language Due to the numerous kinds of errors it will be necessary to classify them and to relate them to certain reasons Furthermore there exists a difference between an error and a mistake Its importance will be discussed later on Even though Error Analysis initially offers helpful opportunities to investigate error production in a structured way it has several disadvantages which were criticized in past decades In the end the conclusion will give an overview of the contents and summarize the handled topics During the last several decades linguists have investigated the way

of acquiring a second language Learners have several ways of acquiring a language and the field of second language acquisition SLA tries to uncover and improve them When people try to learn a foreign language they produce a considerable amount of errors These errors have always been made in the learning process and will never cease to occur During the complex investigations of second language acquisition linguists have focused on Error Analysis EA with its aim to take a deeper look on learner production Around the late 60 s this particular analysis was established with an approach of Pit Corder This system shows that errors should be investigated to understand and also improve the linguists attempts of learning a second language Typical questions which arise are why learners make errors and what reasons do they have Before Pit Corder linguists used the Contrastive Analysis CA which examines certain errors and refers to a particular connection between the first and the second language The differences between these two types of analysis will be examined in detail in the following chapter Several steps are needed to analyze various errors in language Investigators have developed procedures to collect identify describe explain and lastly evaluate certain errors These certain steps will be described and underlined with certain examples

**Error Analysis** Jack C. Richards, 1984 *Theory Construction in Second Language Acquisition* Geoff Jordan, 2004 Recently many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist scientific endeavour The resulting epistemological arguments plus problems of theory proliferation contradicting theories and theory domain hinder progress towards a unified theory of SLA Theory Construction in SLA addresses these problems by returning to first principles it asks whether there is such a thing as reliable knowledge what is special about scientific method and how we can best explain SLA It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA Part One explores the central issues in the philosophy of science defends rationality against relativists and offers Guidelines for theory assessment Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines

*Speakers* Theresa Schmidt, 2009 Thesis M A from the year 2007 in the subject English Language and Literature Studies Linguistics grade 3 0 <http://www.uni-jena.de> 100 entries in the bibliography language English abstract On the basis of questionnaire data this study seeks to find a tendency for native language influence in the judgement of German speaking learners of English Seeing that the concept of language transfer has received diverse weight in the history of second language acquisition SLA the present account illuminates the issue anew with a specific linguistic concern Inversion structures though not canonical are very frequent in the German language whereas the English language offers comparatively rare environments which trigger or allow for inversions As previous studies found language transfer in regard to word order emerged when the native language exhibited flexible word order and the language to be learnt in contrast had a rather fixed one This gave rise to the assumption that German natives would generally accept subject verb inversion in declarative sentences in English even if for a native speaker of English the structure would not be acceptable Thus the second language learners are expected to score high on the acceptability rate for the majority of instances of inversion in English since the German equivalents of the test items are basically quite acceptable in German
