ABSTRACT

The aim of this article is to present a case study of usage of one of the data mining methods, neural network, in knowledge discovery from databases in the banking industry. Data mining is automated process of analysing, organization or grouping a large set of data from different perspectives and summarizing it into useful information using special algorithms. Data mining can help to resolve banking problems by finding some regularity, causality and correlation to business information which are not visible at first sight because they are hidden in large amounts of data. In this paper, we used one of the data mining methods, neural network, within the software package Alyuda NeuroIntelligence to predict customer churn in bank. The focus on customer churn is to determinate the customers who are at risk of leaving and analysing whether those customers are worth retaining. Neural network is statistical learning model inspired by biological neural and it is used to estimate or approximate functions that can depend on a large number of inputs which are generally unknown. Although the method itself is complicated, there are tools that enable the use of neural networks without much prior knowledge of how they operate. The results show that clients who use more bank services (products) are more loyal, so bank should focus on those clients who use less than three products, and offer them products according to their needs. Similar results are obtained for different network topologies.

KEY WORDS

data mining, neural network, banking, customer churn

Predicting Customer Churn In Banking Industry Using Neural:

Smart Computing Paradigms: Intelligence and Network Applications Vikrant Bhateja,Angela Lee Siew Hoong,Jude Dzevela Kong,Shabana Urooj,2026-01-07 This book presents best selected papers presented at the 7th International Conference on Smart Computing and Informatics SCI 2025 held at the School of Engineering and Technology SET Sunway University Selangor Malaysia during 8 9 April 2025 It presents advanced and multidisciplinary research towards the design of smart computing and informatics The theme is on a broader front and focuses on various innovation paradigms in system knowledge intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society environment and industries The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches optimizing solutions in various disciplines of science technology and healthcare The work is published in four volumes Signals, Machines and Automation Asha Rani,Bhavnes Kumar,Vivek Shrivastava,Ramesh C. Bansal,2023-05-22 This book constitutes selected peer reviewed proceedings of the 2nd International Conference on Signals machines and Automation SIGMA 2022 This book includes papers on technologies related to electric power manufacturing processes automation biomedical healthcare communication networking image processing and computation intelligence The book will serve as a valuable reference resource for beginners as well as advanced researchers in the areas of engineering technology Artificial Intelligence and Speech Technology Arun Sharma,Ritu Rani,2025-05-29 This two volume set CCIS 2389 and CCIS 2390 constitutes selected papers presented at the 6th International Conference on Artificial Intelligence and Speech Technology AIST 2024 held in Delhi India during November 13 14 2024 The 40 full papers and 15 short papers presented in these proceedings were carefully reviewed and selected from 398 submissions These papers focus on Speech Technology using AI and AI innovations for CV and NLP They have been categorized under the following topical sections Part I Trends and Applications in Speech Processing Recent Trends in Speech and NLP Emerging trends in Speech Processing Advances in Computational Linguistics and NLP Part II Recent Trends in Machine Learning and Deep Learning Analysis using Hybrid technologies with Artificial Intelligence Exploring New Horizons in Computer Vision Research *Proceedings of the 2nd International Conference on Business and Policy Studies* Canh Thien Dang,Javier Cifuentes-Faura,Xiaolong Li,2023-10-07 This proceedings volume contains papers accepted by the 2nd International Conference on Business and Policy Studies CONF BPS 2023 which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editorial team of the conference This volume presents the latest research achievements inspirations and applications in applied economy finance enterprise management public administration and policy studies CONF BPS 2023 was a hybrid conference that includes several workshops offline and online around the world in Cardiff Jan 2023 London Feb 2023 and Sydney Feb 2023 Prof Canh Thien Dang from King s College London Prof Arman Eshraghi from Cardiff Business School and Prof Kristle Romero Cort s from UNSW Business School have chaired those offline workshop **Innovations in**

Electronics and Communication Engineering H. S. Saini, R. K. Singh, Mirza Tariq Beg, J. S. Sahambi, 2020-04-22 This book is a collection of the best research papers presented at the 8th International Conference on Innovations in Electronics and Communication Engineering at Guru Nanak Institutions Hyderabad India Featuring contributions by researchers technocrats and experts the book covers various areas of communication engineering like signal processing VLSI design embedded systems wireless communications and electronics and communications in general as well as cutting edge technologies As such it is a valuable reference resource for young researchers

Computational Intelligence in Data Science Vallidevi Krishnamurthy, Suresh Jaganathan, Kanchana Rajaram, Saraswathi Shunmuganathan, 2021-12-11 This book constitutes the refereed post conference proceedings of the Fourth IFIP TC 12 International Conference on Computational Intelligence in Data Science ICCIDS 2021 held in Chennai India in March 2021 The 20 revised full papers presented were carefully reviewed and selected from 75 submissions The papers cover topics such as computational intelligence for text analysis computational intelligence for image and video analysis blockchain and data science

Progressive Computational Intelligence, Information Technology and Networking Poonam Nandal, Mamta Dahiya, Meeta Singh, Arvind Dagur, Brijesh Kumar, 2025-07-22 Progressive Computational Intelligence Information Technology and Networking presents a rich and diverse collection of cutting edge research real world applications and innovative methodologies spanning across multiple domains of computer science artificial intelligence and emerging technologies This comprehensive volume brings together different scholarly chapters contributed by researchers practitioners and thought leaders from around the globe The book explores a wide array of topics including but not limited to machine learning deep learning cloud computing cybersecurity Internet of Things IoT blockchain natural language processing image processing and data analytics It addresses the practical implementation of technologies in sectors such as healthcare agriculture education smart cities environmental monitoring finance and more Each chapter delves into specific challenges frameworks and experimental outcomes making this book an essential reference for academicians researchers industry professionals and students who aim to stay ahead in the rapidly evolving digital world

Data Analytics Applications in Gaming and Entertainment Günter Wallner, 2019-07-11 The last decade has witnessed the rise of big data in game development as the increasing proliferation of Internet enabled gaming devices has made it easier than ever before to collect large amounts of player related data At the same time the emergence of new business models and the diversification of the player base have exposed a broader potential audience which attaches great importance to being able to tailor game experiences to a wide range of preferences and skill levels This in turn has led to a growing interest in data mining techniques as they offer new opportunities for deriving actionable insights to inform game design to ensure customer satisfaction to maximize revenues and to drive technical innovation By now data mining and analytics have become vital components of game development The amount of work being done in this area nowadays makes this an ideal time to put together a book on this subject Data Analytics Applications in Gaming and

Entertainment seeks to provide a cross section of current data analytics applications in game production It is intended as a companion for practitioners academic researchers and students seeking knowledge on the latest practices in game data mining The chapters have been chosen in such a way as to cover a wide range of topics and to provide readers with a glimpse at the variety of applications of data mining in gaming A total of 25 authors from industry and academia have contributed 12 chapters covering topics such as player profiling approaches for analyzing player communities and their social structures matchmaking churn prediction and customer lifetime value estimation communication of analytical results and visual approaches to game analytics This book s perspectives and concepts will spark heightened interest in game analytics and foment innovative ideas that will advance the exciting field of online gaming and entertainment

Approach to Predicting Customer Attrition in Banking Wendy M. Gilbert,2004 **Predicting Customer Churn in Telecom Companies Through a Machine-learning Approach** Hlayisani Result Khoza,2024 **NEURAL NETWORKS**

FOR CHURN PREDICTION IN THE MOBILE TELECOMMUNICATIONS INDUSTRY Ionut Brandusoiu,Johnny Brandusoiu,2020-05-12 This book presents a CRISP DM data mining project for implementing a classification model that achieves a predictive performance very close to the ideal model namely of 99 55% This model yields such a high accuracy mainly due to the proprietary architecture of the machine learning algorithm used We implement a multilayer perceptron neural network which is improved using multiple techniques existent in the literature A detailed theoretical explanation is offered regarding multilayer perceptron learning algorithms and several optimization techniques and each decision taken in building the final architecture is motivated To demonstrate the predictive performance of our classification model we use a telecommunications synthetic dataset that contains call details records CDR for 3 333 customers with 21 independent variables and one dependent variable which indicates the past behavior of these customers with respect to churn This is a generic dataset frequently used in research as a benchmark for testing different architectures of machine learning algorithms proposed for classification The methodology presented in this book is scalable to datasets that have hundreds of thousands of instances and hundreds or thousands of variables coming from various industries such as telecommunications finance astronomy biotech marketing healthcare and many others and can be applied to any real world classification problem

Predicting Customer Churn Using Voice of the Customer Carolina Martínez Troncoso,2019 **Effective Algorithms to Predict Customer Churn in Financial Services** Boriane Yousseu Tchaleu,2019 [Predicting Customer Churn in the Telecommunication Industry](#) Anne-Sophie Hadaschik,2017 The increasing occurrence of customer churn that implies customers discontinuation of their current relationship with a service provider has forced many companies in competitive markets to redirect their strategic focus to consider customer acquisition and customer retention equally In particular in the telecommunication industry a high degree of saturation and competition contributed to ever increasing churn rates However

resources of marketing managers to develop valid churn prediction and retention techniques are finite. The aim of this study is to identify customers which are likely to churn with a constrained and thus limited set of characteristics. Therefore this study investigates the churn behavior of customers of a German telecommunication company. The study's findings underline the usefulness of logistic regression when building a churn prediction model. Furthermore, the research shows that a limited number of explanatory variables are sufficient to predict churn with proficient accuracy so that companies may carry out suitable actions to prevent customer churn. In detail, the study identifies a distinct correlation between customer churn behavior and attributes of customer contract history as well as certain demographic variables. In order to focus on profitable customers when managing churn, a classification approach is computed to improve marketing spending. This thesis encourages companies to justify or expand measurements against churn by proposing an easier and more cost-effective means for customer churn prediction.

Understanding Customer Loyalty and Deposit Stability Ryan Kottmann, 2024

Identifying the causes of customer churn in any institution is an increasingly important part of maintaining a profitable business. No where is this more true than in the banking sector in which client deposits are the life blood of banks. This analysis focused on analyzing features from a publicly available data set utilizing SMOTE and a threshold adjustment to gain the best model performance. A Random Forest model was trained using a 70% training / 30% test split and hyper parameters were tuned using Bayesian Optimization. Further threshold adjustment (Threshold 0.44) improved the model's predictive performance (AUC 0.87) enhancing its ability to identify true churned clients while minimizing false positives. The final Random Forest model achieved a better balance of sensitivity and specificity compared to Support Vector Machine (SVM) and XGBoost. These findings offer valuable insights that financial institutions can leverage to study their own customer retention strategies.

Abstract **Machine Learning for Finance** Saurav Singla, 2021-01-05

Understand the essentials of Machine Learning and its impact in financial sector

KEY FEATURES

- _ Explore the spectrum of machine learning and its usage
- _ Understand the NLP and Computer Vision and their use cases
- _ Understand the Neural Network (CNN, RNN) and their applications
- _ Understand the Reinforcement Learning and their applications
- _ Learn the rising application of Machine Learning in the Finance sector
- _ Exposure to data mining, data visualization, and data analytics

DESCRIPTION

The fields of machine learning, adapting profound learning, and computerized reasoning are quickly extending and are probably going to keep on doing as such for a long time to come. There are many main impetuses for this, as quickly caught in this review. Now and again, the advancement has been emotional, opening new ways to deal with long-standing innovation challenges, for example, progresses in PC vision and picture investigation. The book demonstrates how to solve some of the most common issues in the financial industry. The book addresses real-life problems faced by practitioners on a daily basis. The book explains how machine learning works on structured data, text, and images. You will cover the exploration of Naïve Bayes, Normal Distribution, Clustering with Gaussian process, advanced neural network sequence modeling, and reinforcement learning. Later

chapters will discuss machine learning use cases in the finance sector and the implications of deep learning The book ends with traditional machine learning algorithms Machine Learning has become very important in the finance industry which is mostly used for better risk management and risk analysis Better analysis leads to better decisions which lead to an increase in profit for financial institutions Machine Learning to empower fintech to make massive profits by optimizing processes maximizing efficiency and increasing profitability

WHAT WILL YOU LEARN _ You will grasp the most relevant techniques of Machine Learning for everyday use _ You will be confident in building and implementing ML algorithms _ Familiarize the adoption of Machine Learning for your business need _ Discover more advanced concepts applied in banking and other sectors today _ Build mastery skillset in designing smart AI applications including NLP Computer Vision and Deep Learning

WHO THIS BOOK IS FOR Data Scientist Machine Learning Engineers and Individuals who want to adopt machine learning in the financial domain Practitioners are working in banks asset management hedge funds or working the first time in the finance domain Individuals who want to learn about applications of machine learning in finance or individuals entering the fintech domain

TABLE OF CONTENTS 1 Introduction 2 Naive Bayes Normal Distribution and Automatic Clustering Processes 3 Machine Learning for Data Structuring 4 Parsing Data Using NLP 5 Computer Vision 6 Neural Network GBM and Gradient Descent 7 Sequence Modeling 8 Reinforcement Learning For Financial Markets 9 Finance Use Cases 10 Impact of Machine Learning on Fintech 11 Machine Learning in Finance 12 eKYC and Anti Fraud Policy 13 Uses of Data Mining and Data Visualization 14 Advantages and Disadvantages of Machine Learning 15 Applications of Machine Learning in Other Industries 16 Ethical considerations in Artificial Intelligence 17 Artificial Intelligence in Banking 18 Common Machine Learning Algorithms 19 Frequently Asked Questions

Predicting Customer Wallet Nicolas Glady,2008 Each consumer requires a certain quantity of services or products and a single company usually provides only a part of this In the banking sector the total quantity of business a customer does is called the Size of Wallet of this customer and it is generally unobservable From a company perspective the percentage of this business done with the company is called the Share of Wallet of this customer and is usually unobservable as well This paper focuses on the prediction of these values and on the derived concept of Potential of Wallet which is the difference between the Size of Wallet and the actual business the customer does with the focal company In the existing literature the models predicting the customer s wallet need survey data to estimate the model parameters The main contribution of this paper is to propose an approach to predict the customer s wallet without using survey data In the empirical application we show that a company can generate substantial gains by targeting customers having a large Potential of Wallet

Eventually, you will utterly discover a new experience and exploit by spending more cash. still when? reach you recognize that you require to get those every needs later having significantly cash? Why dont you try to get something basic in the beginning? Thats something that will lead you to comprehend even more approximately the globe, experience, some places, taking into consideration history, amusement, and a lot more?

It is your definitely own mature to work reviewing habit. along with guides you could enjoy now is **Predicting Customer Churn In Banking Industry Using Neural** below.

Predicting Customer Churn In Banking Industry Using Neural Introduction

In today's digital age, the availability of Predicting Customer Churn In Banking Industry Using Neural books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Predicting Customer Churn In Banking Industry Using Neural books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Predicting Customer Churn In Banking Industry Using Neural books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Predicting Customer Churn In Banking Industry Using Neural versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Predicting Customer Churn In Banking Industry Using Neural books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Predicting Customer Churn In Banking Industry Using Neural books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Predicting Customer Churn In Banking Industry Using Neural books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions

of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Predicting Customer Churn In Banking Industry Using Neural books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Predicting Customer Churn In Banking Industry Using Neural books and manuals for download and embark on your journey of knowledge?

FAQs About Predicting Customer Churn In Banking Industry Using Neural Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Predicting Customer Churn In Banking Industry Using Neural is one of the best book in our library for free trial. We provide copy of Predicting Customer Churn In Banking Industry Using Neural in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Predicting Customer Churn In Banking Industry Using Neural. Where to download Predicting Customer Churn In Banking Industry Using Neural online for free? Are you looking for Predicting Customer Churn In Banking Industry Using Neural PDF? This is definitely going to save you time and cash in something you should think about.
