Non-Discrimination in International Trade in Services Nicolas F. Diebold, 2010-10-21 The principle of non discrimination is fundamental to the regulation of international trade in goods and services In the context of trade in goods the concept of like products has become a key element of the legal analysis of whether a trade obstacle violates GATT non discrimination obligations The equivalent concept of like services and service suppliers in GATS rules on non discrimination has received little attention in WTO jurisprudence In light of the remaining uncertainties Nicolas Diebold analyses the legal problems of the GATS like services and services suppliers concept using a contextual and comparative methodology The likeness element is not analysed in isolation but in context with less favourable treatment and regulatory purpose as additional elements of non discrimination The book also explores how far theories from non discrimination rules in GATT NAFTA BITs and EC as well as market definition theories from competition law may be applied to likeness in GATS

Internet Tiered Services George N. Rouskas, 2009-04-21 As telecommunications products and services have become an essential part of everyday life consumers have at the same time grown intimately familiar with the concept of tiered pricing that is associated with such services With tiered service structures users may select from a small set of tiers that offer progressively higher levels of service with a corresponding increase in price Tiered structures have been applied in several forms to wireless services e g characterized by the amount of voice minutes number of text messages or the size of one s circle of friends to whom voice calls are free Internet broadband access e g the access speed or volume of monthly transferred data and digital TV offerings e g the number of channels included among others Service tiering is a form of market segmentation which if applied appropriately benefits both providers and consumers by making available services and associated price points that reflect the diversity in consumers needs and ability to pay The purpose of this book is to develop a theoretical framework for reasoning about and pricing Internet tiered services as well as a practical algorithmic toolset for network providers to develop customized menus of service offerings We provide a comprehensive study of the design sizing and pricing of tiered structures for Internet services and we illustrate their potential in simplifying the operation of complex components such as packet schedulers **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles **The Sabbath Recorder** ,1922 **McGraw-Hill Concise Encyclopedia of Engineering** McGraw
