James Popham, 2000 This time honored work provides the most useful tools for accurate assessment of students and how well the goals of curricula are met in this thorough re orientation of Modern Educational Measurement Overhauled to approach the topic from the perspective of the people in the trenches who must master the uses and abuses of testing methods and assessment instruments this book offers timely well documented and extremely practical information on this important subject Further it presents the material in a way that makes it more interesting and engaging than other texts on the market In addition the author s personal engaging and humorous writing style brings the subject matter to life and helps readers maintain their interest in the material The book aims to help educational leaders the administrators and the teachers who must grapple with the problems and the methods of assessment in order to improve educational practices for students everywhere Follows a logical and developmental framework that takes readers from a general overview of the significance of assessment in education to a discussion of how to evaluate the usefulness of different measurement strategies to hands on advice on how to construct accurate and effective assessment instruments to a perceptive overview of the dos and don ts of the field Designed for anyone interested in Educational Measurement and Evaluation Assessment and Testing [Beyond Standardized Testing](#) George W. Elford, 2002-10-23 Here s a fresh idea from an experienced testing professional that addresses the problem of the overuse of standardized testing Elford argues that so called test based reform has given rise to the cram curriculum and turned schools into test prep centers Overlooked are the classroom teachers who observe the actual work of students and are the primary and richest source of information on learning The author lays out a better approach to accountability using standards teacher judgments and the tools of the information age This is not an attack on standardized testing which supplies the only interpretable information the public has been able to attain Rather it recommends comprehensive computer based systems that link every teacher and classroom into their school district s data warehouse This system supports and utilizes the richest source of accountability information the presently un tapped knowledge in the minds of teachers At the heart of the system are standardized teacher judgments related to content and performance standards and supported by standards based scoring rubrics that are integrated into a computer based instructional management information system Among the advantages the system offers are Students are graded on quality of their work not how they compare with other students The school or school district becomes the primary source of accountability information instead of the state Provides better information for college admissions Provides employers with a record to use that shows the link between school and work The technology for such a system is ready and waiting This book defines the urgent need for a computer based instructional information system to which every teacher is linked and calls upon innovative school leaders to embrace the idea
