Mine Planning and Equipment Selection 1996 L.A. Ayres de Silva,A.P. Chaves,W.T. Hennies,1996-01-01 A collection of 125 papers on mine planning and selection of equipment covering such topics as design and planning of surface and underground mines planning and equipment selection for difficult mining conditions equipment selection procedures and mine and equipment information systems *Equipment Selection for Mining: With Case Studies* Christina N. Burt,Louis Caccetta,2018-03-02 This unique book presents innovative and state of the art computational models for determining the optimal truck loader selection and allocation strategy for use in large and complex mining operations The authors provide comprehensive information on the methodology that has been developed over the past 50 years from the early ad hoc spreadsheet approaches to today s highly sophisticated and accurate mathematical based computational models The authors approach is motivated and illustrated by real case studies provided by our industry collaborators The book is intended for a broad audience ranging from mathematicians with an interest in industrial applications to mining engineers who wish to utilize the most accurate efficient versatile and robust computational models in order to refine their equipment selection and allocation strategy As materials handling costs represent a significant component of total costs for mining operations applying the optimization methodology developed here can substantially improve their competitiveness *Optimization Techniques and their Applications to Mine Systems* Amit Kumar Gorai,Snehamoy Chatterjee,2022-09-30 This book describes the fundamental and theoretical concepts of optimization algorithms in a systematic manner along with their potential applications and implementation strategies in mining engineering It explains basics of systems engineering linear programming and integer linear programming transportation and assignment algorithms network analysis dynamic programming queuing theory and their applications to mine systems Reliability analysis of mine systems inventory management in mines and applications of non linear optimization in mines are discussed as well All the optimization algorithms are explained with suitable examples and numerical problems in each of the chapters Features include Integrates operations research reliability and novel computerized technologies in single volume with a modern vision of continuous improvement of mining systems Systematically reviews optimization methods and algorithms applied to mining systems including reliability analysis Gives out software based solutions such as MATLAB AMPL LINDO for the optimization problems All discussed algorithms are supported by examples in each chapter Includes case studies for performance improvement of the mine systems This book is aimed primarily at professionals graduate students and researchers in mining engineering Mine Planning and Equipment Selection 1995 J. Hadjigeorgiou,A.K. Mehmotra,R. Poulin,R.K. Singhal,1995-10-31 This text presents about 150 papers based on an international symposium on mine planning and equipment selection held in Canada in 1995 Coverage includes design and planning of surface and underground mines surface mining and the environment tailings disposal and slope stability analysis *Underground Ventilation* Purushotham Tukkaraja,2023-07-27
