Response Surface Methodology Raymond H. Myers,Douglas C. Montgomery,1995-09-12 The primary objective of response surface methodology is to aid the statistician and other users of statistics in applying response surface procedures to appropriate problems in many technical fields Although methods are emphasized in the book a certain amount of theory is presented so that a reader with sufficient background in mathematics especially in the algebra of matrices can obtain an exposure to the theoretical development While response surface techniques are widely used it seems that a need exists for an exposition which contains a considerable amount of the basic material under a single cover At the time it is felt this book may create a continued awareness of the

basic techniques among the potential users

Automated Response Surface Methodology for Stochastic Optimization Models With Unknown Variance Robin P.

Nicolai,2007 Response Surface Methodology RSM is a tool that was introduced in the early 50 s by Box and Wilson 1951 It is a collection of mathematical and statistical techniques useful for the approximation and optimization of stochastic models Applications of RSM can be found in e g chemical engineering and clinical sciences In this paper we are interested in finding the best settings for an automated RSM procedure when there is very little information about the stochastic objective function We will present a framework of the RSM procedures for finding optimal solutions in the presence of noise We emphasize the use of both stopping rules and restart procedures Good stopping rules recognize when no further improvement is being made Restarts are used to escape from non optimal regions of the domain We compare different versions of the RSM algorithms on a number of test functions including a simulation model for cancer screening The results show that considerable improvement is possible over the proposed settings in the existing literature Response Surface Methodology Raymond H.
