Use the pedigree below to answer 1-5

- In a pedigree, a square represents a male, if it is darkened he has hemophilia; if clear, he had normal blood clotting.

However, if the line is connected to another horizontal line, then several children were produced, each indicated by a short vertical line connected to the horizontal line. The first child born appears to the left and the last born to the right.
  - How many children did the first couple (couple in row I) have? **2**
  - How many children did the third couple (couple in row III) have? **7**
- Level I represent the first generation, level II represents the second generation.
  - How many generations are there? **4**
  - How many members are there in the fourth generation? **7**

Use the pedigree below to answer 6-12

- Write the generation on the pedigree numbers (roman numerals).
- Which members of the family above are afflicted with Huntington's Disease? **I-1, II-2, II-3, II-7, III-3**
