David Harvey's Geography (RLE Social & Cultural Geography) John Paterson, 2014-01-23 The emphasis of this book is to explore two major philosophical influences in contemporary human geography namely logical positivism and Marxism and to explore the relationships between philosophy methodology and geographical research Rather than being a biography of David Harvey the book contributes to the understanding of one of the most innovative and iconoclastic scholars in contemporary Anglo American human geography

Spaces of Hope David Harvey, 2000 There is no question that David Harvey's work has been one of the most important influential and imaginative contributions to the development of human geography since the Second World War His readings of Marx are arresting and original a remarkably fresh return to the foundational texts of historical materialism Derek Gregory author of *Geographical Imaginations*

[Spaces of Global Capitalism](#) David Harvey, 2019-03-12 Fiscal crises have cascaded across much of the developing world with devastating results from Mexico to Indonesia Russia and Argentina The extreme volatility in contemporary economic fortunes seems to mock our best efforts to understand the forces that drive development in the world economy David Harvey the single most important geographer writing today and a leading social theorist of our age offers a comprehensive critique of contemporary capitalism In this fascinating book he shows the way forward for just such an understanding enlarging upon the key themes in his recent work the development of neoliberalism the spread of inequalities across the globe and space as a key theoretical concept Both a major declaration of a new research programme and a concise introduction to David Harvey's central concerns this book will be essential reading for scholars and students across the humanities and social sciences

The Limits to Capital David Harvey, 2018-11-06 A major rereading of Marx's critique of political economy Now a classic of Marxian economics *The Limits to Capital* provides one of the best theoretical guides to the history and geography of capitalist development In this edition Harvey updates his seminal text with a substantial discussion of the turmoil in world markets today Delving into concepts such as fictitious capital and uneven geographical development Harvey takes the reader step by step through layers of crisis formation beginning with Marx's controversial argument concerning the falling rate of profit and closing with a timely foray into the geopolitical and geographical implications of Marx's work

Justice, Nature and the Geography of Difference David Harvey, 1997-01-23 This book engages with the politics of social and environmental justice and seeks new ways to think about the future of urbanization in the twenty first century It establishes foundational concepts for understanding how space time place and nature the material frames of daily life are constituted and represented through social practices not as separate elements but in relation to each other It describes how geographical differences are produced and shows how they then become fundamental to the exploration of political economic and ecological alternatives to contemporary life The book is divided into four parts Part I describes the problematic nature of

action and analysis at different scales of time and space and introduces the reader to the modes of dialectical thinking and discourse which are used throughout the remainder of the work Part II examines how nature and environment have been understood and valued in relation to processes of social change and seeks from this basis to make sense of contemporary environmental issues Part III is a wide ranging discussion of history geography and culture explores the meaning of the social production of space and time and clarifies problems related to otherness and difference The final part of the book deploys the foundational arguments the author has established to consider contemporary problems of social justice that have resulted from recent changes in geographical divisions of labor in the environment and in the pace and quality of urbanization Justice Nature and the Geography of Difference speaks to a wide readership of students of social cultural and spatial theory and of the dynamics of contemporary life It is a convincing demonstration that it is both possible and necessary to value difference and to seek a just social order

Spaces of Neoliberalization David Harvey, 2005 In these essays David Harvey searches for adequate conceptualizations of space and of uneven geographical development that will help to understand the new historical geography of global capitalism The theory of uneven geographical development needs further examination The extreme volatility in contemporary political economic fortunes across and between spaces of the world economy cries out for better historical geographical analysis and theoretical interpretation The political necessity is just as urgent since social inequalities have increased in recent decades Fiscal crises have cascaded across much of the developing world with devastating results from Mexico to Indonesia Russia and Argentina Simultaneously the different oppositional movements to neoliberalism create both opportunities and barriers in the search for alternatives Harvey shows that this search needs to be supported by a deeper theoretical understanding of the roles of space and uneven geographical development in shaping the world around us
