Empowering Science and Mathematics for Global Competitiveness Yuli Rahmawati, Peter Taylor, 2019-06-07 This conference proceedings focuses on enabling science and mathematics practitioners and citizens to respond to the pressing challenges of global competitiveness and sustainable development by transforming research and teaching of science and mathematics. The proceedings consist of 82 papers presented at the Science and Mathematics International Conference SMIC 2018 organised by the Faculty of Mathematics and Natural Sciences Universitas Negeri Jakarta Indonesia. The proceedings are organised in four parts: Science, Science Education, Mathematics, and Mathematics Education. The papers contribute to our understanding of important contemporary issues in science, especially nanotechnology, materials, and environmental science; science education in particular environmental sustainability, STEM, and STEAM education; 21st century skills; technology education; and green chemistry and mathematics and its application in statistics, computer science, and mathematics education. *The Korean Journal of Policy Studies*, 2012

Karl Marx and Mathematics Pradip Baksi, 2020-11-01 This collection of various texts on Karl Marx and Mathematics is the revised and extended second edition of the Special Supplement to Karl Marx Mathematical Manuscripts 1994 Calcutta Viswakos titled Marx and Mathematics. The sources of the texts included in the three parts of this collection and some biographical information about their respective authors have been indicated at the end of each text. The emergence and development of the Ethnomathematics movement continue to change our understanding of the history of evolution of plural mathematics on planet earth since the Neolithic age. Rediscovery and study of some of the neglected source texts have further energized investigations on the subsequent history of mathematical cultures including those on the histories of algebra and analysis in some of the ancient and medieval languages of Asia like Sanskrit, Arabic, and Malayalam. Consequently, it is now possible to indicate some of the larger gaps in the dominant understanding of history of mathematics not only in Marx's time but also at the time of editing Marx's mathematical manuscripts in the twentieth century and even today. Finally, the emergence and development of mathematical and statistical software packages are vigorously reshaping our ways of conceptualizing and doing mathematics towards an unknown future. It is time now for taking yet another look at all mathematical text from the past and that includes the mathematical manuscripts of Marx. These texts have been divided into three parts: Part one contains some topical texts related to the history of emergence, development, editing, publication, and reception of the mathematical manuscripts of Karl Marx; Part two contains a selection of five articles reflecting some of the investigations inspired by these manuscripts in Russia, India, and France; Part three contains five articles on plural mathematics before and after Karl Marx (1818-1883). The texts in this collection are followed by two appendices containing two bibliographies: one on Hegel and mathematics and the other on mathematics and semiotics. Please note: This title is co-published with Aakar Books, New Delhi. Taylor & Francis does not sell or distribute the print edition in South Asia, India, Sri Lanka, Nepal, Bangladesh, Pakistan, Maldives, or Bhutan.
