Let the diameter - D  
length - L.

$$\text{Volume of material} = (\pi D L)t + \left(\frac{\pi D^2}{4}\right)t + \left(\frac{\pi D^2}{4}\right) \times 2t$$

$$V = t \left[ \pi D L + \frac{\pi D^2 t}{2} \right] \quad \text{--- (i)}$$

Volume of ~~sheet~~ Container =  $\left[ \frac{\pi D^2}{4} \right] \cdot L$

$$L = \frac{4V}{\pi D^2}$$

$$V = t \left[ \pi \times D \times \frac{4V}{\pi D^2} + \frac{\pi D^2 t}{2} \right]$$

**Advancing Research in Information and Communication Technology** Michael Goedicke, Erich Neuhold, Kai Rannenberg, 2021-08-03 For 60 years the International Federation for Information Processing IFIP has been advancing research in Information and Communication Technology ICT This book looks into both past experiences and future perspectives using the core of IFIP's competence its Technical Committees TCs and Working Groups WGs Soon after IFIP was founded it established TCs and related WGs to foster the exchange and development of the scientific and technical aspects of information processing IFIP TCs are as diverse as the different aspects of information processing but they share the following aims To establish and maintain liaison with national and international organizations with allied interests and to foster cooperative action collaborative research and information exchange To identify subjects and priorities for research to stimulate theoretical work on fundamental issues and to foster fundamental research which will underpin future development To provide a forum for professionals with a view to promoting the study collection exchange and dissemination of ideas information and research findings and thereby to promote the state of the art To seek and use the most effective ways of disseminating information about IFIP's work including the organization of conferences workshops and symposia and the timely production of relevant publications To have special regard for the needs of developing countries and to seek practicable ways of working with them To encourage communication and to promote interaction between users practitioners and researchers To foster interdisciplinary work and in particular to collaborate with other Technical Committees and Working Groups The 17 contributions in this book describe the scientific technical and further work in TCs and WGs and in many cases also assess the future consequences of the work's results These contributions explore the developments of IFIP and the ICT profession now and over the next 60 years The contributions are arranged per TC and conclude with the chapter on the IFIP code of ethics and conduct [Springer Handbook of Computational Intelligence](#) Janusz Kacprzyk, Witold Pedrycz, 2015-05-28 The Springer Handbook for Computational Intelligence is the first book covering the basics the state of the art and important applications of the dynamic and rapidly expanding discipline of computational intelligence This comprehensive handbook makes readers familiar with a broad spectrum of approaches to solve various problems in science and technology Possible approaches include for example those being inspired by biology living organisms and animate systems Content is organized in seven parts foundations fuzzy logic rough sets evolutionary computation neural networks swarm intelligence and hybrid computational intelligence systems Each Part is supervised by its own Part Editor's so that high quality content as well as completeness are assured **Intelligent Healthcare Systems** Vania V. Estrela, 2023-08-04 The book sheds light on medical cyber physical systems while addressing image processing microscopy security biomedical imaging automation robotics network layers issues software design and biometrics among other areas Hence solving the dimensionality conundrum caused by the necessity to balance data acquisition image modalities different resolutions

dissimilar picture representations subspace decompositions compressed sensing and communications constraints Lighter computational implementations can circumvent the heavy computational burden of healthcare processing applications Soft computing metaheuristic and deep learning ascend as potential solutions to efficient super resolution deployment The amount of multi resolution and multi modal images has been augmenting the need for more efficient and intelligent analyses e.g computer aided diagnosis via computational intelligence techniques This book consolidates the work on artificial intelligence methods and clever design paradigms for healthcare to foster research and implementations in many domains It will serve researchers technology professionals academia and students working in the area of the latest advances and upcoming technologies employing smart systems design practices and computational intelligence tactics for medical usage The book explores deep learning practices within particularly difficult computational types of health problems It aspires to provide an assortment of novel research works that focuses on the broad challenges of designing better healthcare services

*Evolutionary Algorithms for Solving Multi-Objective Problems* Carlos Coello Coello, David A. Van Veldhuizen, Gary B. Lamont, 2013-03-09 Researchers and practitioners alike are increasingly turning to search optimization and machine learning procedures based on natural selection and natural genetics to solve problems across the spectrum of human endeavor These genetic algorithms and techniques of evolutionary computation are solving problems and inventing new hardware and software that rival human designs The Kluwer Series on Genetic Algorithms and Evolutionary Computation publishes research monographs edited collections and graduate level texts in this rapidly growing field Primary areas of coverage include the theory implementation and application of genetic algorithms GAs evolution strategies ESs evolutionary programming EP learning classifier systems LCSs and other variants of genetic and evolutionary computation GEC The series also publishes texts in related fields such as artificial life adaptive behavior artificial immune systems agent based systems neural computing fuzzy systems and quantum computing as long as GEC techniques are part of or inspiration for the system being described This encyclopedic volume on the use of the algorithms of genetic and evolutionary computation for the solution of multi objective problems is a landmark addition to the literature that comes just in the nick of time Multi objective evolutionary algorithms MOEAs are receiving increasing and unprecedented attention Researchers and practitioners are finding an irresistible match between the population available in most genetic and evolutionary algorithms and the need in multi objective problems to approximate the Pareto trade off curve or surface

**Research Anthology on Agile Software, Software Development, and Testing** Management Association, Information Resources, 2021-11-26 Software development continues to be an ever evolving field as organizations require new and innovative programs that can be implemented to make processes more efficient productive and cost effective Agile practices particularly have shown great benefits for improving the effectiveness of software development and its maintenance due to their ability to adapt to change It is integral to remain up to date with the most emerging tactics and techniques involved in the development of new and innovative
