schedules productivity measurement investment portfolio management sports league scheduling ranking models etc affords a practical mechanism for achieving that goal Another important contribution of the book is that it provides coverage of the mechanics of some common yet sophisticated statistical methods regression logistic regression discriminant analysis factor analysis and cluster analysis which are often opaque to many users of such methods *Implementing Large-Scale Optimization Models in Excel Using VBA*. Larry J. LeBlanc, Michael Galbreth, 2008 We discuss the importance of spreadsheets for optimization modeling including a description of their limitations for large scale problems We then describe efficient ways to overcome these limits Our approach makes use of Excel s standard functionality but augments Excel with its programming language Visual Basic for Applications VBA where necessary We show how using VBA within Excel to generate and solve large linear programs LPs overcomes many of the problems inherent in purely spreadsheet based models and greatly increases model usability The techniques described were instrumental in our successful development of a large scale procurement distribution LP that resulted in savings of approximately 1 000 000 in the first year with even greater annual savings expected in the future
