Chapter 2 Diversity in Organizations

1) Kimberly Ortiz strongly believes in working for a company that promotes diversity. She believes that such organizations are respectful of differences and allow employees more exposure. She recently attended an interview where she was told that the company follows policies that focus on organizational diversity. However, when she finally joined the company, she had a strong feeling that the company's claim was not true. Which of the following, if true, weakens Kimberly's belief that the company does not encourage diversity?

- A) Eighty-five percent of the top management positions in the company are held by men.
- B) She is the only African-American member in the entire workforce.
- C) The workforce is not dominated by any specific ethnic or racial group.
- D) The previous company she worked for made a conscious effort to employ an equal number of men and women.
- E) Her team members believe that they are treated equally in spite of differences in performance.

Answer: C

Explanation: The fact that the workforce is not dominated by any one ethnic or racial group indicates that the workplace has a mix of all ethnicities and races and does not discriminate. The fact that 85 percent of the top management positions of the company are held by men works against the argument because it shows that the company is biased toward men. In addition, if Kimberly is the only African-American member in the entire workforce, it shows that the company is biased toward other racial groups. Kimberly's previously working for a company that believes in gender equality is irrelevant to this argument. Her team members being treated equally in spite of differences in performance represents unfair discrimination. It works against the argument.
