

Palo Alto Firewall Interview Questions and Answers

Ques 1. What is the role of Virtual Wire interface in Palo Alto firewall?

Virtual wire is a deployment method of Palo Alto NGFW deployment, where the firewall is installed transparently on a network segment between two firewall ports and passes traffic through as layer 2. Virtual wire is internal to the firewall since it performs the change IP address, IP range, or subnet. The best thing about virtual wire is that it does not require any change to adjacent network devices.

Ques 2. What is APP-ID?

App-ID is a feature in Palo Alto NGFW which enables us to see the applications on the network and learn how they work, their behavioural characteristics and associated risks. App-ID identifies application functions via multiple methods –

- Application signatures
- Decryption
- Protocol decoding
- Heuristics.

The App-ID service can block high risk applications, as well as high risk behaviour, such as file-sharing, and traffic encrypted with the SSL protocol can be decrypted and inspected.

Ques 3. How does App-ID identify the application used in network?

Identification of the applications is the very 1st task performed by Palo Alto Networks NGFW traversing the network using App-ID. Below are the identification mechanisms–

- Application protocol detection and decryption where application protocol is determined and if SSL is in use, decrypts the traffic so that it can be analysed further.
- Application protocol decoding where it determines whether the initially detected application protocol is the actual one, or if it is being used as a tunnel to hide the actual application.
- Application signatures where Context-based signatures look for unique properties and transaction characteristics to correctly identify the application regardless of the port and protocol being used.
- Heuristics is applied for traffic that eludes identification by signature analysis. Heuristics identifies any troublesome applications, such as P2P or VoIP tools that use proprietary encryption.
