Giora Shoham, 2004 This is not a work on physics nor is it a tract on personality but rather an effort to link them together in order to examine the cognitive relationship of humans with their surroundings We explore the interaction between the human mind and energy matter the adoption of quantum mechanics allows us to bridge the distinction between physics and psychology We invoke here the principles of quantum mechanics symbols and great myths from Tantalus Sisyphus and Prometheus through the Kabbalah and the Gnostic religions to great historical figures in art and literature Our personality theory first expounded in *The Myth of Tantalus* 1979 is expanded here into truly interdisciplinary research examining the relationship of humans with God and the universe We claim that myths reflect the human mind more profoundly than any other means available they serve as a bridge to unknown parts of the human psyche and history and form the basis for human behavior for centuries We

therefore use a method we call myth empiricism It is indeed amazing to see the connection between the structure of the human mind and that of energy matter as it is reflected in the mytho empirical context
