

# Probability formula

Probability formulas are used to calculate the probabilities of events

Finding the probability of an event A happening can be calculated using the formula

$$P(A) = \frac{\text{Number of times A occurs}}{\text{Total number of possible outcomes}}$$

$$P(\text{not } A) = 1 - P(A)$$

For mutually exclusive events:  $P(A \text{ or } B) = P(A) + P(B)$

For independent events:  $P(A \text{ and } B) = P(A) \times P(B)$
